St. Michael, MN Dunn Bros Coffee

New Construction

Project Summary:

The overall construction services for this project located in St. Michael, MN were provided by RJ Marco Construction, Inc. who acted as the general contractor and developer on the project. Fullerton's scope of work included the Exterior Wall panels, Roof Truss System and Factory Applied Exterior Finishes. Dunn Bros. Coffee utilized an FFS Brickwal veneer utilizing an Endicott thin brick in colors selections of Sienna Iron spot Velour and Grey Sands. The epoxy color that constitutes the joint look between the brick was a Black Sand color. Exterior EIFS utilized a Dryvit acrylic finish in an Eggshell Cream color. FFS BlockCast accents were provided in an 8x16 pattern and a Cotton color. FBS provided a complete furnish and install package. This building package was delivered and erected on-site in June of 2015

Meet or Exceeding Owners Goals, Values and/or Expectations:

The franchisee/owner and operator, Matt Kamman selected Fullerton for the quality and consistency of the finish product.

Matt's testimonial – *" The idea of having the bulk of the construction work on our 2,700 sq./ft. building done in an enclosed environment - protected from the elements as well as insects and rodents was very appealing, as was the freedom to choose the combination of stone finishes we wanted for the exterior. It also allowed us to do all of the necessary site work while the building itself was building constructed at the Fullerton factory. That saved us nearly eight weeks of construction time, a huge financial benefit. The result is a much higher quality building that is really attractive. Our opening was fantastic and our Fullerton building drew a lot of customer comments on it attractiveness."*
