introducing a revolutionary approach
to adult day programs for individuals with IDD throughout Central PA

Pathways is more than a program... it's a philosophy

that says all people, regardless of their abilities, deserve the opportunity and the supports that will empower them to live the most independent, self-fulfilled life possible.

We all want the same basic things in life. ***Some of us just take a different path to get there.*** Please join us on March 3 to learn if Pathways is the right path for you.
