

Comparative Effectiveness Research: From All Angles

May 24-25, 2016 (9:00 a.m. - 5:00 p.m.)

Wood Building, Ground Floor, WG-86

Comparative Effectiveness Research – a core piece of Health Care Reform – will have major impact on every part of our health care delivery system. Learn about the methods, and how it will impact health policy, physician practice, health care organizations, and economics of payment. Also, what barriers do we face to acceptance of CER by the general public and legislators? What are the ethical, legal and social issues that are raised, but have yet to be addressed?

Cost-Effectiveness Analysis: Crash course, May 31-June 2 (9:00 a.m. - 5:00 p.m.), Wood, WG-86

Take for fun or academic credit (EPBI/MPHP 467)

Visit www.CERCME.wordpress.com or contact Mendel Singer, PhD MPH at 216.368.1951 (mendel@case.edu) for registration information.
