

# 52 WEEKS OF SCIENCE

## BARRIO LOGAN

### UPDATE

- 30 events
- 20 different STEM disciplines
- More than a DOZEN locations across Barrio Logan!

**“I never thought a program like this could come to our neighborhood.”**

In just six months since the collaborative program’s launch in Barrio Logan, 2,729 people have participated in 52 Weeks of Science free weekly events. We are already seeing the positive results of community collaborations, expanded STEM resources into Barrio Logan, and residents’ and partners’ growing excitement that science is happening where they live, work and play.

Getting the message out about 52 Weeks of Science has been a combination of the program partners spreading the word through their networks, billboards and bus shelter signage, schools, community banners and door-to-door delivery of brochures in Spanish and English.

Together, we look forward to another successful six months of providing accessible 52 Weeks of Science programming in Barrio Logan!

**GROWN FROM 30 TO 56  
COMMUNITY PARTNERS**

**2,729 PEOPLE SERVED**  
(AS OF MARCH 30TH)

### TEACHING, LEARNING AND SHARING HANDS-ON SCIENCE

Earlier this year, scientists from the Salk Institute trained students from Barrio Logan College Institute (BLCI) on DNA extraction. In turn, BLCI partnered with the Monarch School to host an event for community members to try their hand at DNA extraction. This is just one of the many examples of collaboration in action.
