

RRTC – EBP VR

Rehabilitation Research & Training Center for
Evidence Based Practice in Vocational
Rehabilitation

April 2016

What is the Rehabilitation Research and Training Center on Evidence-Based Practice in Vocational Rehabilitation (RRTC-EBP-VR)?

We develop evidence-based knowledge and tools for VR practitioners that will improve employment rates, and quality of employment, for people with disabilities.

(approval pending)

Bridging the Gap: A Comparative Assessment of Vocational Rehabilitation Agency Practices with Transition-Age Youth

Recent research identifies practices that may help state VR agencies better assist youth bridge the gap between school and work or post-secondary education. Learn more about these practices and get access to additional resources [here](#)

Reducing the Need for Personal Supports among Workers with Autism Using an iPod Touch as an Assistive Technology: Delayed Randomized Control Trial

This study was the first randomized clinical trial to investigate AT as a vocational support tool for adults with ASD. Findings suggest that adults with ASD needed less job coaching support when they used an iPod Touch as AT...and it may be a cost savings for VR agencies. [Learn more about these findings!](#)

Phase II Findings: Evidence-based Best Practices in the Public Vocational Rehabilitation Program that Lead to Employment Outcomes

Findings from the RRTC's Phase II study are featured in a Special Issue of the Journal of Vocational Rehabilitation. [All articles are available at no cost!](#)

Technical Assistance and Training

The RRTC-EBP VR is your resource on evidence-based practices in vocational rehabilitation.
