

## Why Would You Pay to See Me Walk a Mile in High Heels?

... Because domestic violence does not just affect women. It affects the men who care about them. It affects their families, their friends, their coworkers and their communities.

... Because one in four women are victims of domestic violence. That means someone you know, someone you care about, has been or may be the victim of domestic violence.

Now, what *will* you pay to see me walk a mile in high heels?
