HealthEquity Mobile App and Comparison Tool « **Back**

Our HSA banking partner, HealthEquity, has several new features that can be shared with employers.

HealthEquity mobile app is easy to use

The HealthEquity mobile app is available for download in the Apple App Store and Google Play Store. HealthEquity's mobile app provides easy access to a member's account wherever they are.

Members can use the HealthEquity app to check balances, view history, pay claims or reimbursements, link the debit card to transactions, take pictures of receipts, see messages, send a question to HealthEquity, and more. Some of the newest features include an enhanced claim payment process, and for iOS users, the ability to log in using Touch ID.

The app is being enhanced so that in the coming weeks, members will be able to use the mobile app to:

- Review and make contributions
- Manage investments from a mobile device
- Chat with Member Services specialists

Download and try out the HealthEquity app today. Then encourage your groups to spread the news to their employees.

HealthEquity Plan Comparison Tool available for employers to customize
