MEET OUR SPONSORS!

PLATINUM SPONSOR

Users want to personalize their workspace and access the data they need to be productive, but IT needs to manage policy, security and performance in the context of secure endpoints. AppSense solution provides Personalization, Policy; Security & Compliance; File Sync & Share; and Analytics.

Aruba Networks designs and delivers Mobility-Defined Networks that empower a new generation of tech-savvy users. Aruba's solutions are unified into one cohesive and manageable enterprise mobility infrastructure that strengthens security, simplifies how users and devices connect, and eases the burden on IT.

Barracuda Networks offers industry-leading solutions designed to solve mainstream IT problems while maintaining a level of customer support and satisfaction. Their products span three distinct markets, including content security, networking and application delivery, and data storage, protection and disaster recovery.

Check Point Software Technologies Ltd. provides customers with uncompromised protection against all types of threats, reduces security complexity, and lowers total cost of ownership. Check Point continues to develop new innovations based on the Software Blade Architecture that can be fully customized to meet the exact security needs of any organization.

PLATINUM SPONSOR

Citrix solutions pave the way for businesses to thrive in the cloud era, embracing mobile users, personal devices, wireless access, app stores, SaaS, and cloud infrastructure. Citrix protects and controls confidential business information with the right level of secure access across devices, locations and networks.

IntraSystems and ColoSpace have partnered to provide businesses with a cost effective service that allows flexibility and convenience for their workforce. This solution brings together desktop, applications, and IT services into a single cloud environment – allowing users to access their apps and data from any device, anywhere in the world.

ComTrade is in the business of providing infrastructure management products for heterogeneous, multi-vendor environments. ComTrade builds Management products for Citrix that help you measure, monitor and manage with a complete end-to-end view of the Citrix environment from within Microsoft SCOM.

For 30 years, Dell has empowered countries, communities, customers and people everywhere to use technology to realize their dreams. Customers trust us to deliver technology solutions that help them do and achieve more, whether they're at home, work, school or anywhere in their world.

A world leader in thin and zero client solutions, IGEL Technology helps organizations improve the agility, efficiency, and security of their virtual desktop and application delivery systems. IGEL produces a wide range of thin and zero clients, including our powerful management software for easy deployment and administration of all devices.

Lua unleashes the power of mobility by putting your entire company in the palm of your hand. Quickly and easily reach anyone in your organization in real-time with secure texting, group calling and attachments. Lua makes companies better at what they do by simplifying the way workers connect. Lua does this with an enterprise mobile messaging solution that's instant, secure, and keeps everyone accountable.

Nutanix delivers web-scale converged infrastructure to medium and large enterprises with its software-driven Virtual Computing Platform, natively converging compute and storage into a single solution to drive unprecedented simplicity in the datacenter. Customers can start with a few servers and scale to thousands, with predictable performance and economics.

NVIDIA GRID™ technology delivers true PC graphics-rich experiences to users throughout an organization by offloading graphics processing from the CPU to the GPU in virtualized environments. Moreover, by adding GRID software and NVIDIA GPUs to an existing Citrix solution, data center managers can finally empower more users with full graphics capability, wherever they are.

UniPrint pioneered and patented the use of PDF-based universal printer driver to streamline printing in server-based computing environments. Their printing virtualization technology simplifies print management and enables anywhere, any device printing on demand for all network or cloud computing environments.

Varonis provides an innovative software platform that allows enterprises to map, analyze, manage and migrate their unstructured, human-generated data. This type of unstructured data includes an enterprise's spreadsheets, word processing documents, presentations, audio files, video files, emails, text messages and any other data created by employees.
