

How to improve your customer experience?

Do you know one of the most important aspects for a hotel ...? Leave a good first impression to your customers, right when they walk through the door. Nothing is more satisfying than entering a hotel that feels and smells fresh, that's exactly what the Ozonair™ from EMO3 can do for you.

A powerful disinfectant and deodorizer, ozone kills bacteria 3,000 times faster than chlorine. It is unrivalled in controlling numerous types of bacteria, including E.coli and fecal coliforms as well as deactivating viruses, fungi, and mildew. Ozone also eliminates organic odours and contaminants in the workplace. Properly installed and well applied, ozone is safe to use, is non-carcinogenic, and produces no residues or toxic by-products.

Rapidly and easily deployed in conjunction with your HVAC system, the Ozonair™ provides continuous air treatment for your entire hotel building.

The patented and CSA approved Ozonair™ not only leaves a fresh air in your hotel, but it also reduces indoor mold by 85% , reduces fine and ultrafine particles by 80% and can eliminate any type of persistent and recurring odour (smoke, mildew, organic).

Stop waiting and offer a better air quality to your customers and your employees!
