

Emily Truong

Emily started her career in the PCB industry this past summer after a 9 month internship at Taiyo's Carson City facility. She earned her M.S. in Chemistry from the University of Oregon and B.S in Chemical Engineering from the University of Nevada – Reno with a Senior Scholar Award for the top student of the department. With her fresh mind out of college, skills and passion, Emily will be able to bring Taiyo America new perspectives and innovative ideas.

"Emily is a great asset to Taiyo America and I look forward to the contributions that she will make toward our future growth." said Jesse Session, Taiyo's Technical Manager.

In her spare time, Ms. Truong enjoys exploring outdoors, traveling, cooking, and spending time with her friends and family. Her determination to live life to the fullest embodies Taiyo's vision for a better tomorrow.

Emily joins another relatively new Chemist at Taiyo...

Lisa Kennedy

Lisa brought great potential to the Taiyo America R & D team in June of 2013 with a B.S. in Chemistry and an M.S. in Polymers and Coatings Science from California Polytechnic State University of San Luis Obispo.

Lisa's diverse work history brings a unique background to Taiyo's Research and Development group. As an intern at DuPont, Lisa became very familiar with inorganic pigments and surface treatments. Her experience has contributed greatly to the development of new products.

In addition to industry experience, Lisa spends time teaching Chemistry at the local college. In her free time, she enjoys playing rugby, football, basically any water sport, and snowboarding. Lisa's energy, dedication, and passion for science will continue to contribute to Taiyo's future growth.
