Busting Myths about Ecologically Sustainable Energy

**Historic Wesley Chapel, Horton Street,
Port Macquarie (next to KFC)**

Associate Professor Mark Diesendorf

Dr Mark Diesendorf is Deputy Director of the Institute of Environmental Studies, UNSW. His latest book, *'Sustainable Energy Solutions for Climate Change'*, will be available at the wholesale price (\$33 cash).

Mark's presentation shows how myths intended to deny and denigrate renewable energy are being busted by both practical experience and academic research.

How many climate skeptics does it take to change a light bulb?
