

Will County

2040 LONG RANGE TRANSPORTATION PLAN

Provide Your Input and Help Shape Will County's Long Range Transportation Plan

Will County officials kicked-off "**Will Connects 2040**", the County's initiative to update its current long range transportation plan. **Will Connects 2040** will establish a strategic direction and set priorities for future transportation investments throughout the County while considering all modes and modal connections, including roads, transit, bicycle and pedestrian, aviation, intermodal networks, and freight – and the unique needs of each part of the County. **Will Connects 2040**, led by the County's Division of Transportation (DOT), will be developed over the next 18 months and will set an agenda through 2040, creating a blueprint for transportation investment and policy for fast growing Will County.

Starting this January, Will County DOT launched an online community engagement tool on its project website, www.WillConnects2040.org, to gather input early in the planning process. Residents, business owners, transportation users and the general public are invited to weigh in on issues, needs, and priorities for Will County's transportation system. **You, too, can contribute!**

Take Will County's transportation survey at www.WillConnects2040.org and share this flyer or survey information with your friends, neighbors, and colleagues!

Will Connects 2040

Progress

Your Ideas Matter Shaping our future, today!

WELCOME

With our prime location, extensive transportation and freight-related infrastructure, affordable quality of life, and skilled workforce – it's no wonder that **Will County** is one of the fastest growing counties in the US!

As **Will County** continues to grow over the next 25 years, **Will Connects 2040** will be our roadmap for transportation, guiding transportation investments for everyone who lives, works, and plays here.
