12:30 pm Luncheon

Keynote: Neil Perry, Director Supply Chain Operations Integrated Defense Systems, Raytheon Company
"Supply Chain Transformation"

Raytheon is a leading technology and innovation company that consistently delivers superior performance, relationships and solutions to our customers, helping them meet their national security and defense needs, both at home and abroad. Our customers need us to "do more with less" — that means providing the most advanced capability at the lowest possible price. When roughly 70 percent of a program's cost comes from materials, we know we can reduce costs by sourcing smarter. To do this, we're using data analytics, collaborative technology, and partnership on initiatives with our suppliers (example Strategic Sourcing, Supplier Engineering, Supplier Advisory Council, Supplier Development, Mentor-Protégé, etc).
