

# PSS 154

## Compost Ecology & Management

**Learn about** the ecological, physical, and chemical principles behind composting, practical management of a compost facility, and the myriad benefits of using compost in agricultural ecosystems and beyond! (3 credits)

**An engaging mix** of lectures, hands-on activities and demonstrations, site tours, and guest lectures from seasoned composters and facility managers. Analyze feedstock materials and build your own compost pile!

**Instructor:** Tom Herlihy, M.S., Founder RT Solutions

**Dates:** July 05 - August 12, 2016; Tues/Thurs 1:00pm - 4:00pm  
UVM Horticulture Research & Education Center
