

## NAMI Maryland Attends the NIMH Outreach Partnership 2015 Annual Meeting

As part of our recent partnership with the National Institute of Mental Health, NAMI Maryland recently attended the NIMH Outreach Partnership Program Annual Meeting, August 18-20, at NIH in Bethesda, MD.

Outreach Partners from around the country convened to learn from esteemed researchers and experts about important research projects, recent advancements in the understanding and treatment of mental illness and key initiatives that NIMH is undertaking. Further, partners had the opportunity to connect and share information about their own outreach projects during a sharing session. NAMI Maryland highlighted the tools and methods we use for outreach around the state.

We look forward to disseminating the science-based information from NIMH about the causes, diagnosis, treatment and prevention of mental illness throughout the year, to our network of more than 20,000 families, individuals, community-based organizations and service providers. Our partnership with NIMH strengthens our ability to carry out our mission; improving the quality of life for individuals with serious mental illnesses and their families.
