## 2016 Charles Mraz Apitherapy Course and Conference (CMACC) October 21-23, 2016

### **The Redondo Beach Hotel**

400 N. Harbor Drive

Redondo Beach, CA 90277

The American Apitherapy Society proudly announces its 20th annual Charles Mraz Apitherapy Course & Conference to be held in the beautiful beach community of Redondo Beach, CA located just 15 minutes south of Los Angeles International Airport (LAX). Invest in your health and join us for a weekend of Apitherapy while perhaps extending your stay in the area to enjoy the many ocean front activities this area has to offer.

Medical doctors, a spectrum of holistic health practitioners, veterinarians, researchers, backyard beekeepers, and members of the general public interested in self-reliant health care will convene from all over the United States and the world to learn about apitherapy. Apitherapy, an ancient healing modality, refers to the therapeutic use of products from the beehive: honey, pollen, royal jelly, propolis, and bee venom therapy.

Attendees will receive basic training in the therapeutic properties of each of the hive products including a hands on bee venom therapy session where participants obtain practical experience with this amazing healing practice. Presentations are given by the CMACC faculty who are some of the most prominent and experienced apitherapists in the country. Examples of material covered in these presentations are allergic reactions, techniques of BVT, informed consent and legal issues, propolis and cancer, Lyme disease, Parkinson's disease, veterinary apitherapy, wound healing, and much more. Certificates of completion will be available to all participants.

The AAS is a nonprofit membership organization established for the purpose of education in the advancement of Apitherapy. CMACC has been named in memory of Charles Mraz, an American pioneer in the use of bee venom to treat diseases.

**More information and details will be available soon at [www.apitherapy.org](http://www.apitherapy.org)** where you will be able to view all CMACC information and register for the course online. Conference information will also be shared and distributed via our free monthly newsletter, you can sign up to receive the newsletter via a link at the bottom of our home page of the website. There will be an early registration incentive with reduced fees for those registering by a certain date which is yet to be determined, so don't miss out on this opportunity! A Friday night dinner banquet will be held giving attendees the opportunity to mingle with the faculty and others involved with Apitherapy. Membership or a one year renewal to AAS is included with the course fee. For further questions please contact the AAS office at [aasoffice@apitherapy.org](mailto:aasoffice@apitherapy.org).
