

CMACC 2015 Preliminary Academic Program: Chronic Inflammation
May 15-17, 2015 in New York

Being added to the program are:

Dr. Allen Dennison, MD speaking on how raw honey heals wounds, plus a demo of flash compounding of honey ointment and wound dressing techniques. Participants will take home a wound healing kit including ointment, bandages and scissors.

Frank Yurasek, PhD, L.Ac., MSOM speaking on the topic of "BVT Acupuncture Remote Therapy/Delivering Healing Power to the People" based on his continued work with Veterans and their wives to overcome the neurotoxic ravages of Agent Orange and other Battlefield Poisons! The premise of the power of this e-therapy is texting acupuncture sting sites to ever watchful wives.

Dr. Michael Gurevich, MD speaking on Api-Toxin, Bee venom injections, including a patient demo session.
