

# Colorado College Fairs and Information Nights

## 2015-2016

**College Fair Registration**—Many college fairs are automated, and students are encouraged to register ahead of time. If a student chooses to register for an automated fair, he or she will be provided a barcode which will allow the student to easily share their information with their colleges of interest during the college fair. This greatly improves the efficiency for students and colleges because it puts an end to filling out info cards at every table. For fairs that do not use an automated system, students are encouraged to print personal labels ahead of time. Students can then simply place a label on the college information cards rather than filling them out by hand.
