Births Attended by Midwives – Indiana 1990 - 2014
Births Attended by Midwives – Iowa 1990 - 2014

Graph showing the percentage of births attended by midwives in Iowa from 1990 to 2014. The graph includes data for all midwives, CNMs/CMs, and other midwives. The percentage trend shows a steady increase over the years.
Births Attended by Midwives – Kentucky 1990 - 2014

The chart shows the percentage of births attended by midwives in Kentucky from 1990 to 2014. The data is broken down by midwife type:

- All Midwives
- CNMs/CMs
- Other Midwives

The percentages are relatively low, with a slight increase over time, particularly noticeable in the CNMs/CMs category. The chart highlights the trend in midwifery services in Kentucky over the specified years.
Births Attended by Midwives – Louisiana 1990 - 2014

The graph shows the percentage of births attended by midwives in Louisiana from 1990 to 2014. The y-axis represents the percentage ranging from 0.00% to 35.00%, and the x-axis represents the years from 1990 to 2014. The graph includes data for all midwives, CNMs/CMs, and other midwives. The percentages for each category remain relatively consistent over the years, with slight fluctuations. The data indicates a steady contribution of midwives to birth attendances in the state.
Births Attended by Midwives – Maine 1990 - 2014

The graph shows the percentage of births attended by midwives in Maine from 1990 to 2014. There are three categories: All Midwives, CNMs/CMs, and Other Midwives. The percentage of births attended by All Midwives has steadily increased over the years, starting from a low percentage in 1990 and rising to 35.00% in 2014. CNMs/CMs also show an increase, though at a slightly lower rate than All Midwives. Other Midwives remain at a very low percentage throughout the period.
