Type of Construction

New Construction

Project Summary:

FFS provided BrickWal panels on this new building package for HyVee Construction. HyVee Construction is a repeat business client with a long list of projects where FFS has been a key supplier of exterior veneer finishes. This particular project incorporated not only a C-Store, but a Caribou Coffee space as well. The BrickWal finish utilized is an Endicott Red Blend, Medium 77 and Ivory.

Meet or Exceeding Owners Goals, Values and/or Expectations:

Working early on in the process with the clients in-house design process, helping develop a new prototype design that ultimately incorporated a number of value engineered design modifications. The finished product fit together seamlessly, allowing for interior finish activities to be started two (2) weeks earlier than what they would typically see. This project also had cold weather challenges and potential additional costs that the FFS BrickWal veneer assisted in minimizing.

Client Profile:

Working as a key exterior finish material provider for HyVee Weitz, FFS provided a partial finish materials shell for this repeat business client.
