

## **Research Analyst Student Internship**

### **Duties and Responsibilities**

As a student intern with TwoFour Insight Group, you will be asked to work on various research and writing projects that impact the pharmaceuticals, biotechnology-medicines, and medical devices market with a particular focus on the United States (U.S.) and Indian markets for these life science products. Please note that the focus of the research will not be on scientific or research and development work. Instead, the focus will be on commercial, regulatory, compliance, and sales & marketing. Below are some of the representative types of research and writing projects that will be assigned to the intern.

- Conduct assigned research and analysis on a variety of topics relating to pharmaceuticals, biotechnology, or medical devices, including, but not limited to, market, government procurement, competitive, financial, regulatory, intellectual property, and compliance information. Specific opportunities for research will be assigned based on aptitude, knowledge and experience of the analyst.
- Monitor, identify, capture, and analyze news, regulatory, policy, market and business developments relating to pharmaceuticals, biotechnology, or medical devices.
- Develop and maintain a broad understanding of the pharmaceuticals, biotechnology, and medical devices sectors, especially from commercial and regulatory perspective.
- Develop and edit short 300 to 400 word articles and reports on research conducted in the life sciences sector by the intern.
- Other projects may be assigned depending on the skill set of the intern.

### ***Work Environment***

Interns will be expected to work from home. To be considered for the internship position, the intern will be required to have a reliable computer and Internet access. The intern will be expected to take direction remotely via teleconference, videoconference and other forms of communication, and be able to work alone or in coordination with others. The intern will receive assignments on a weekly basis with typical turn-around time of one (1) week. Assignments should not take more than ~ 10 hours per week, so it will be up to the intern to prioritize sufficient time to complete the assignment.

**Contact Information**

If you would like to be considered for this internship please submit a cover letter, resume, and writing sample to [info@twofourinsight.com](mailto:info@twofourinsight.com) with the Subject Line: “Research Analyst Internship”.
