

Do-It-Yourself 1095 Form Generator

The Affordable Care Act.

Landmark legislation, mandating coverage to millions of underinsured or uninsured individuals. But for thousands of employers, a new burden of compliance was born. And as employers considered—agonized—over the “hows,” a common question emerged: how will we produce the required Forms 1094-C and 1095-C in January?

For some organizations, the payroll provider has stepped up to take on the form-generation responsibility. For others, a benefits administration or stand-alone ACA software company is helping fill the void.

But for a large number of employers, these options simply are not available—or not at a price that fits their budget. Beyond locking themselves in a room in January with a stack of forms, a box of ballpoint pens, and an endless supply of coffee, these employers see no other solution. They feel helpless.

With the DIY1095 Form Generator, you have a solution that removes that helpless feeling and puts you in charge of the process.

By leveraging DIY1095, you have access to a web-based, user-friendly tool that helps HR/Benefits professionals such as yourself, more efficiently manage the forms-generation process. For you, this translates to reduced errors, greater productivity and additional time to focus on other things.

Product Highlights... So, at a glance, what does the DIY Form Generator offer?

For starters, the DIY Form Generator is for employers with fewer than 250 forms to create. For these organizations, the DIY Form Generator features:

- An automated template for HR/Benefits professionals to generate compliant, accurate Forms 1094-C and 1095-C (or 1094-B and 1095-B for small employers).
- An intuitive “Wizard,” that prompts you to answer the right questions at the right time.
- A simple print feature once all data has been successfully entered.
- Online support tools and resources are available, should you need help along the way.
- A secure website and login – designed to help assure you that all the information entered remains safe and secure.

DIY1095 is easy as 1, 2, 3!
