

REUNITED

Everything Is Rosie

This very sweet black Lab/terrier started her travels in St. Paul, Minnesota, heading by car with her pet parents to Chicago. This playful girl then jetted to London, after a few days delay in the Windy City. It sure can be overwhelming for a family to make a move across the ocean, but Rosie, now safely snuggling in her new home is ready to take on London's doggie parks!

"Our pet relocation counselor and her team did an absolutely wonderful job making sure that our dog Rosie arrived to the UK in the safest and easiest way possible. We originally had a lot of anxiety around making sure that Rosie would be able to fly to the UK, but our counselor and her team made everything so clear and easy to follow. Additionally, their responsiveness to any question we had was extremely valuable to us. If we ever need to have Rosie fly again we will definitely use World Care Pet Transport. Thank you so much!!"
