NOW RECRUITING VOLUNTEER FIREFIGHTERS

Camden County Fire Rescue is looking for dedicated individuals who want to make a difference in their community. Camden County is proud to have a premier fire and emergency medical services department offering services to over 50,000 citizens and spanning over 680 square miles. The rewards of serving your community are endless and the experiences will be some of the most exciting you could ever be a part of.

Each day there will be a short presentation to go over the mission of the program and the incentives available to volunteer firefighters. We invite you and your family to come out and join us to see what the program has to offer you and your community.
