

turning old electronics into new opportunities

What We Recycle

Currently, we accept e-waste items that contain electronic circuitry, working or not, such as:

Computers/Laptops/Desktops
Modems, Motherboards, Servers
Keyboards, Mice
Hand-held devices

Computer Wire/Cables (all types)
Hard Drives (safe-lock secure shredder)
Speakers, Cell phones
Printers, Fax Machines, Calculators

EcoSafe Processors cannot accept items that may dispense hazardous fumes, liquids or gases.

Our Clients

While we encourage you to contact us to discuss your particular recycling needs, we contract primarily with:

Large corporations
Small businesses

Educational institutions
Government agencies

Electronics manufacturers
Not-for-profit organizations

Challenging Limits... Changing Lives

It *IS* Easy Being Green

Getting rid of your e-waste isn't as easy as it used to be. In 2011, the new Electronic Products Recycling and Reuse Act banned the disposal of electronics in landfills.

EcoSafe Processors can stop these new regulations from expanding your liability and shrinking your bottom line!

At EcoSafe, we make it easy to be green. We don't just provide e-recycling services, we offer peace of mind through our guarantee that your data will remain secure and your e-recycling program will stay compliant.

For more information about EcoSafe Processors' e-recycling solutions, contact Chip Young today at cyoung@southstarservices.org or (708) 518-9935.

Why EcoSafe Processors?

National Certification

EcoSafe Processors is an R2/RIOS, nationally certified e-recycler. Our employees go through extensive training in e-recycling standards and we are committed to using only best practices when it comes to safely and effectively recycling your electronics.

Certified Down-Streaming

EcoSafe Processors recycles all electronics in accordance with today's strict electronic waste standards. We use only e-Stewards BAN or EPA R2/RIOS certified downstream recycling processors.

Guaranteed Data Protection

Your security is our number one priority. At EcoSafe Processors, we use our state-of-the-art hard drive shredder to ensure your data is completely erased and destroyed. Still concerned? We encourage you to send a representative to observe the on-site destruction of your hard drive.

Free Pick-up for Large Loads

While our competitors charge fees per ton of waste removal, we offer our customers the advantage of free pick-up and delivery for those supplying large amounts of electronic waste.

Credit Towards State BEP Goals

Subcontracting with SouthSTAR Services, a certified State Use vendor, offers your organization the added advantage of earning credit towards state Business Enterprise Program (BEP) goals.

The Opportunity to Change Lives

When you choose EcoSafe Processors as your e-recycler, you are making a choice that is both environmentally sound and socially responsible. EcoSafe Processors transforms your old electronics into new, long-term employment opportunities for people with disabilities.
