

Instructions for printing, folding and assembling the program for *Aeschylus Unbound*

The program is attached as three documents:

- 1) the main program itself
- 2) the front side of the insert
- 3) the back side of the insert

(please print insert back-to-back on a different color of paper.)

These are PDF documents. As long as you open them with Adobe, the formatting and fonts should be right, but just look it over to be sure it looks right to you. If you have questions, please don't hesitate to ask.

When it is all assembled, you'll have three sheets of paper, all two-sided and **folded**, making a booklet of twelve "pages."

4) the fourth document attached, "Page Order and Layout" is for you to use as a guide: It has the twelve pages numbered with a black marker, indicating the order of the pages once the booklet is assembled. I've also noted which pages go back-to-back. (12 & 1 to 2 & 11; 10 & 3 to 4 & 9; and the "insert" 6 & 7 to 8 & 5). The **insert**, i.e. the sheet of paper with "pages" 5 through 8, should be printed on a **different color** from the rest of the program to make clear that it is an insert ("Timeline" and "The Life of Aeschylus").

Hope this is clear and helpful. Thank you for printing this and putting it together!
