<https://va.train.org>
Course ID #1058616

Webinar Instructors

Dr. Dirk G. Schroeder

Executive VP/ Chief Health Officer
HolaDoctor.com

Gloria Giraldo

Director, Strategic Initiatives
Latino Health Access

Virginia's Spanish-speaking population has more than doubled in the last 15 years. In 2014, 10 percent of clients seen at our local health districts were Spanish-speaking.

Have you ever...

- Felt limited in your ability to effectively communicate with and serve this population because you don't understand their language or culture?
- Wanted to know "what works" to better educate and engage Hispanics in prevention and care programs?
- Needed to have a better understanding about this population in order to do your job?

Come join us for a class designed to help!

Course title: It's all about *Salud* (Health) - How to work effectively with Spanish speakers

Group participation is encouraged for this webinar. Meeting rooms with internet access will facilitate interaction. At the VDH Madison Building, participants will meet in the mezzanine conference room. The URL, telephone number and pass codes will be provided to all registrants.
