*Residency training is essential to the future of Reach Out and Read. We count on family medicine and pediatric residents to become ambassadors for Reach Out and Read as they move into practice, and we count on their training to make Reach Out and Read second nature as they develop their pediatric primary care routine.*

*Join us for a discussion about effective ways to present the art and science of Reach Out and Read to residents. Please call in and share what works at your program as well as the obstacles you encounter. We look forward to your questions, insights, and opinions. Or perhaps just sit back, listen, and gather new ideas! (60 min.)*
