

Metropolitan Indianapolis
Central Indiana Area
Health Education Center

Offerings 2016

MESSAGE FROM THE DIRECTOR

A healthy Indiana needs healthy communities, and it needs health professionals located in all areas of the state—from the inner cities to the rural neighborhoods prepared to help educate citizens about health problems and issues and to provide high-quality healthcare. Area Health Education Centers (AHECs) play an important role in providing communities with healthcare professionals prepared to meet their needs.

The mission of the Metropolitan Indianapolis Central Indiana Area Health Education Center (or MICI-AHEC) is to address regional healthcare workforce shortages through education and collaborative community relationships that assist students, career seekers, and health professionals. MICI-AHEC is one of eight AHECs based in communities across the state and is responsible for a nine-county region, which includes Boone, Hamilton, Hancock, Hendricks, Johnson, Madison, Marion, Morgan, and Shelby counties.

Our strategies include:

- introducing young people and adult career seekers to healthcare career options.
- developing opportunities for future health professionals to receive their clinical training in underserved areas.
- providing continuing education and professional support to health practitioners.
- recruiting health professionals to serve in underserved communities.

The year 2016 brings more activities and summer opportunities than ever for Indianapolis and Central Indiana youth and adults. As you will see, our summer programs are geared toward all interest areas in health care and an age range from 5th through 12th grade. Scholarships are available to those who have inability to pay for those programs with a fee. We encourage you to fill out the application and indicate your need for such a scholarship.

Healthcare providers and health professionals also are encouraged to peruse our offerings and to contact me if interested. We are always seeking new partnerships to offer even more opportunities for youth and adults interested in healthcare careers.

Thanks, and I hope you enjoy your summer!

Sincerely,

Kimberly R. McElroy-Jones, PhD, DMin, FACHE, MHA, MS

Executive Director, University of Indianapolis

A HEALTHY INDIANA NEEDS HEALTHY COMMUNITIES

The Metropolitan Indianapolis Central Indiana Area Health education center seeks to provide communities with healthcare professionals who are prepared to meet their needs.

The goal of the MICI-AHEC program is to enhance access to high-quality healthcare, particularly primary and preventive care, by improving the supply and distribution of healthcare professionals through community/academic educational partnerships.

An important way to achieve this goal is through community outreach and clinical exposure and by providing access to resources and continuing education opportunities.

This guide provides a sampling of classes and educational programs available in 2016 through MICI-AHEC.

Most camps require a fee; however, financial assistance is available for those who apply and qualify. For more information, please call (317) 788-2001.
