

# Wolfbotics at the FIRST Robotics Regional Competition March 2016 at the UCF Arena in Orlando

Type to enter text

The WolfBotics team members participated in three days of matches with 63 other teams from around the United States and the world, including South Carolina, Puerto Rico, Hawaii, Germany, The Netherlands and China.

During "build season", the team spent 8 weeks planning, building and testing a fully functioning competition robot to enter this year's qualifying tournament. The WolfBotics team then travelled to Orlando and competed in 9 grueling matches to earn a spot in the elimination rounds. The team finished the event in two Quarterfinal Rounds resulting in a 22nd overall ranking and 13th ranking in offensive power.

It was an amazing weekend of teamwork, resourcefulness, gracious professionalism, and cooperation.

Think you have what it takes to construct a robot? See a WolfBotics member for more information. Replays of this year's matches can be seen at: <https://www.youtube.com/user/RoboVisionOD>
