

Electronic Cigarettes—What's the Big Deal?

E-Cigarettes Are Readily Available

Electronic cigarettes are devices that use a battery to heat a liquid nicotine solution, or e-liquid, that is then inhaled as an aerosol.

You can find e-cigarettes in most stores in Inyo County, and you can also buy them online. Companies advertise them as a healthy alternative to smoking, but studies have found they contain harmful chemicals.

Common Brands

Blu Vuse Njoy Mistc Krave Fin

Common Flavors

Vanilla	Chocolate	Apple	Cherry
Coffee	Root beer	Melon	Banana
Candy	Cake	Pineapple	Mint

Reusable
vape pen

We Know Teens Are Trying Them!

In 2013, more than a quarter million middle and high school students in the U.S. had never smoked regular cigarettes but had used e-cigs.

In Inyo County, 37% of 9th graders and 13% of 7th graders have tried e-cigs. 13% of 9th graders and 9% of 7th graders currently use e-cigs, higher than the rate of cigarette use among those age groups.

E-Cigarettes Are Harmful

The aerosol is a mixture of chemicals and small particles that can hurt the lungs whether it contains nicotine or just flavorings.

E-cigs are also used to smoke substances like marijuana and hash oil.

E-liquids come in fruit and candy flavors that appeal to children who may taste or drink the e-liquid.

E-liquids in flavors like clove, vanilla, & berry
