

APRIL 2016

MARINE ISSUE

SHOP SOLUTION

"I installed pulleys at the top of my 20-ton press. I ran cables from the bed up and over the top. I welded up the ends of 2 pieces of 4" square pipe to form 2 bucket which I loaded with enough lead tire weights to act as a counterbalance to the bed. Now I can raise and lower the bed with one finger. I also use an air jack to make life easier".

Read all six tips in Engine Builder Magazine, or register for Sterling's e-news and get it delivered to your inbox on the first Friday of every month.

This Tip earned Steve Potz, Steve's Engine Shop, Cocoa, FL, a \$100 Visa card.

Free Stuff

- E-News. Sign-up for Sterling's electronic newsletter e-mailed on the first Friday of every month. CURRENT ISSUE published on April 1st. Ask a salesman or email request to: news@kcenginepro.com
