World Obesity Member Portal

World Obesity is proud to announce the launch of our Online Members' Portal. This is an exciting development which allows our members exclusive access to connect with other members, register for conferences at reduced rates, register for SCOPE e-Learning at a discounted rate and more!
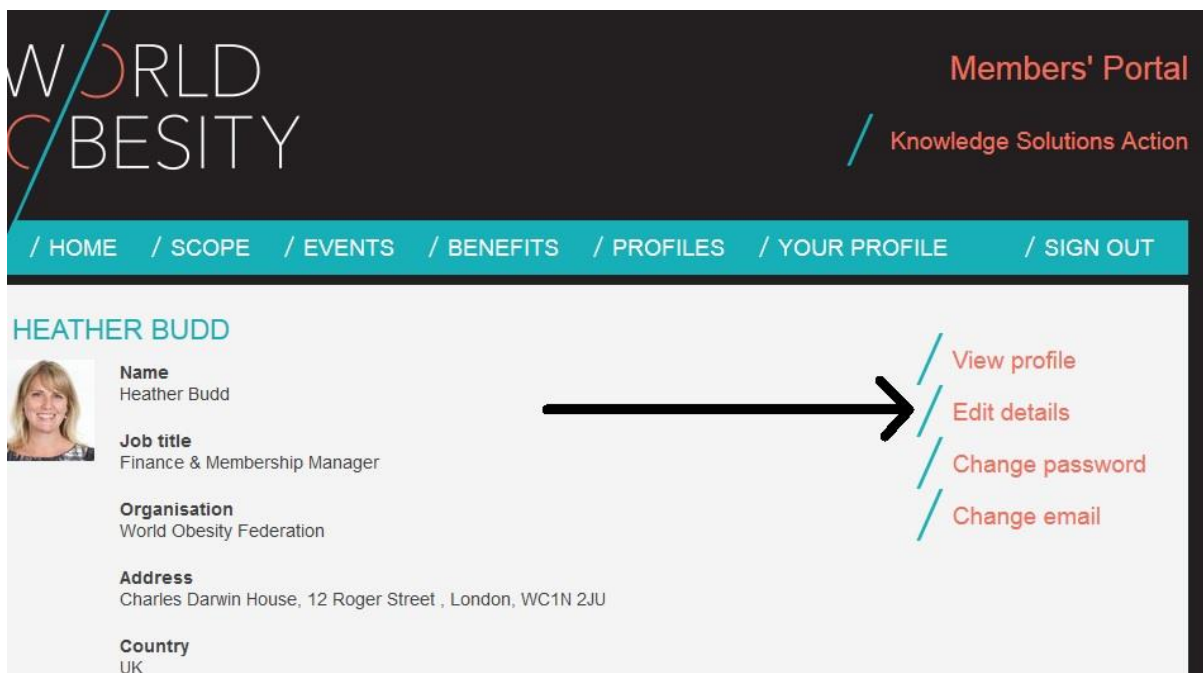

In order to access the system you will need to visit the following link

http://portal.worldobesity.org/en-gb/accounts/password/reset/

The system will recognise your email address so long as your National Association has provided us with your name and email address. Once you enter your email address, click the **Send password** button and the system will automatically email you a link to set a password.

Once you have logged on to the system you can access and edit your user profile. You need to click **Your Profile** from the menu. You will see options on the right side of the screen; please click **Edit details**. We kindly ask you to update your details should they be out of date. You can also change the email registered to your account from this side menu.

Within the Edit Profile function there is an option to make your profile either hidden or registered (see below). If you choose to make your profile *Registered* this allows other members to see your profile and gives them the potential to contact you for networking purposes. If your profile is set to *Closed*, then no one will be able to view your profile.

If you have any trouble accessing the system please contact Heather Budd at hbudd@worldobesity.org
