

PSAT RESULTS ON-LINE- January 7

Students will be able to access their scores on-line January 7.

Online score reports will no longer be called My College QuickStart, but students will have access to a new, robust online reporting portal that will expand to include scores from all the tests in the SAT Suite of Assessments. Students can interact with their score report, filtering test questions by difficulty and skill and viewing complete answer explanations. The College Board does not send score reports to parents any longer so your only access to the scores and the report is online.

Go to <https://studentscores.collegeboard.org> You will need to create an account to access these scores.
