

# FIRE DOOR SYSTEMS

## A GUIDE TO CODE COMPLIANCE

FRIDAY, MARCH 11, 2016

5 AIA/HSW/LUs @ 1 hour each  
.5 ICC/CES/CEUs @ .1 each

- *Definitions—the 5 Walls of the IBC*
- *Elevator Separation*
- *Exit Access Separation*
- *Vertical Opening Separation*
- *Occupancy Separation*
- *Area Separation*
- *Corridor Separation*
- *Smoke Compartmentation*

Understand the fundamental guideline principles that govern the provisions of Chapters 3 through Chapter 10 in the 2015 International Building Code

A 1 day seminar to discuss the compliance issues presented when opening protection is required by the code. The specific code sections where opening protection is required will be discussed with options for providing that protection along with short case studies will be the main focus. Each participant will receive a work book that outlines the information to be discussed. Exit access separation, vertical opening separation, and occupancy separation along with other areas will be covered. Questions are strongly encouraged.
