

Research Volunteers Needed

Do you have an incomplete spinal cord injury from **C3 to T10**?

- ❑ Can you stand or walk a few steps with an assistive device?
- ❑ Can you spare one hour per day to work out?

We use cycling exercise with leg **FES** (functional electrical stimulation).

Potential outcomes:

Improvements in walking speed, walking endurance, postural balance, muscle strength, cardiopulmonary health, and nervous system.

The training period is 12 weeks total:
1 hour per day, 5 days per week.

The staff will be flexible to accommodate your schedule, even after hours or on weekends.

**Participants from outside
Edmonton will have
monthly lodging covered.**

- Your participation is voluntary. Your confidentiality is assured.

Our lab is in the Katz building (attached to the U of A hospital).
