

Master the Art of Injectables

COURSE COST: \$2,450 (\$250 deposit to secure your position in the upcoming course; \$50 is non-refundable)

Our Injectables Course includes:

Mastering the art of Injectables is critical to success in the growing Medical Esthetic Business, and these skills are increasing in demand! The good news is that the art of injecting neuromodulators (Botox, Dysport & Xeomin) and dermal fillers (Belotero, Juvederm Ultra XC, Juvederm Ultra Plus XC, Juvederm Voluma, Restylane Silk, Restylane Lyft and Radiesse Plus) is not difficult to master. The service does not require a large up-front investment and can be lucrative when one establishes a patient relationship. Discussion at the follow-up appointment regarding combination therapy will include dermal fillers, skin care products and laser therapy to provide the patient with the best possible outcome. The first step involves obtaining quality instruction and overcoming initial fears about injecting. We are pleased to offer this high quality hands-on instruction to qualified professionals. This two day intensive class will launch your career as an Injector. You will be provided a comprehensive theoretical framework, understanding the products and will be guided step by step through the injection process. As a result, you will have the skills and confidence to begin injecting immediately! Our master instructor has an active injectable practice with a renown Plastic Surgeon. She offers mentoring after the course and is available for phone or on site consultation (when possible). Clinic Shadowing opportunities are also available where you will learn advanced techniques beyond what you will learn in class at no extra cost! **This Course is offered to Physicians, Physicians Assistants, Nurse Practitioners, Registered Nurses and Estheticians.**

Dermal Fillers

- Different type of Fillers
- Mechanism of action
- History of Fillers
