CALIFORNIA

Senior Civil Engineer – San Jose, CA #3386 - For the civil engineer who is ready to be a leader in business development and senior project management, this multi-disciplinary firm is offering a senior role for the South Bay Area. This leader will be able to leverage the extraordinary reputation of the firm to further grow their client base which is already established but has potential for growth. Clients are a mix of high tech campuses, commercial site development, and land development. Excellent firm and working environment. (#3386)

[Return to Job Listings](#)

Mid-Level Industrial Hygienist – Sacramento Area, CA #3525 - Mid-Level Industrial Hygienist needed for a nationally recognized leader in the health, safety and environmental consulting and training field. This

is an exciting, diverse and strong firm, in business over 25 years and has a strong future. They have continued to be successful and stable, even through the downturn. Position requires a B.S. degree, and either the DOSH SST or CAC credentials are considered a plus. (#3525)

[Return to Job Listings](#)

Office Surveyor – East Bay Area, CA #3693 – Opportunity in the East Bay Area for an Office Surveyor. This is an immediate opening for a Licensed Land Surveyor or possibly an LSIT with strong growth potential. The type of surveying experience needed includes boundary surveys, control surveys, topographic surveys, and recorded maps and exhibits for example. This is a great chance to join a well-established firm who supports their staff to grow to their highest potential in a very collaborative work environment. The people at this company are always approachable, friendly, and willing to help each other. People who we have recently helped to join this firm, really enjoy the work atmosphere and the staff who work there. (#3693)

[Return to Job Listings](#)

Senior Water/Wastewater Engineer – Sacramento, CA #3541 - Opportunity for a Civil Water/Wastewater Engineer to join a successful firm that offers a unique combination of small size (flexibility), yet established record (40+ years), and qualified staff to provide project execution resources. **The time is right** - this long-established firm recognizes that now is the time to take advantage of the recovering economy. We are searching for a professional who can help them grow by opening doors and supervising public works projects in Northern California. Clients include municipal, private development companies, attorneys, special districts, regional and state agencies.

This is an outstanding opportunity for a hands-on client manager who values ownership potential. This employee-owned firm has young energy and a bullish future. The individual who joins them will have a track record of working with established contacts in Northern California, and the ability to make a contribution to the development of their growing staff. With success, this individual will enjoy the rewards of a performance-based work environment and potential for Ownership. (#3541)

[Return to Job Listings](#)

Environmental Planner – San Jose, CA #3690 - Searching for an Environmental Planner who is open to joining a national engineering consulting firm in San Jose. This is a chance to grow in your career in a collaborative environment and work on exciting large-scale sustainable projects. The person who takes on the role will be the right-hand to a Regional Vice-President at the firm. The firm is looking to expand their planning and entitlement practice and this position will be an integral role in contributing to the firm's growth. The role is ideal for someone with experience in managing and preparing CEQA documents, preparation of plans, and other planning documents in support of a full range of infill and/or land development related projects.

The firm provides a phenomenal retirement package and a great work life balance. They believe in working hard and having fun while doing it. In the last ten years they have been listed seven times, including in 2015, as one of Fortune 100's Best Companies to Work For. If you are interested in growing in your career to your highest potential with an entrepreneurial group this may be the right opportunity for you. (#3690)

[Return to Job Listings](#)

Civil Land & Site Development Engineers - Northern and Southern CA # 3689 - Our client is a leading civil engineering firm in Northern California since 1915. The Silicon Valley Business Journal has ranked them as the top civil engineering firm in the Bay Area for over 10 years! And, they were recognized as a "Top Work Place" in 2013 and 2014. They are a mid-size firm of 300 people throughout 11 offices, including Southern California. This company is continuing to grow and is recruiting mid to senior level civil engineers with strong technical abilities in the Land Development field. We are looking for

individuals with 5+ years of experience who can independently evaluate, select, and apply standard engineering techniques, procedures. There is no holding back people who are interested in becoming Principals in the firm. (#3689)

[Return to Job Listings](#)

Civil Project Manager – Los Angeles, CA #3687 - Searching for a Professional Engineer for an opportunity in Los Angeles. The right professional will have strong experience in site development design and team management. They will be responsible for project management, spearheading plan processing, and being a direct interface with clients. This is a chance to join a firm who values their employees and has been recognized as one of the best firms to work for in the nation by CE News Magazine. They are passionate for supporting professional development and as result 65% of their employees have moved up through the ranks at the firm. They work hard at creating a healthy work environment, and people are proud and passionate to work there.

This firm offers a variety of project types and someone who feels pigeon holed to monotonous tasks in their career elsewhere will get to work on a more diverse array of projects. The types of projects may include urban infill, podium, commercial, green streets, dense projects, master planned communities, and hotels. (#3687)

[Return to Job Listings](#)

Senior Hydrogeologist – Santa Barbara, CA - #3686 - Searching for an experienced Hydrogeologist for an opportunity in Santa Barbara with a well-established consulting firm who provides environmental, water resources, and engineering services. Someone with successful local project and client management experience of environmental and water resource projects will be ideal for this opportunity and will be provided with the chance to grow to their highest potential in a collegial atmosphere. The right person for this role will either be interested in developing their business development skills or may already be strong in client management/development. This is a chance to join an employee-owned firm that provides the ability to work independently while having the opportunity to collaborate with a dynamic team of professionals who deliver high quality work products consistently. (#3686)

[Return to Job Listings](#)

Civil Water/Wastewater Engineers – Santa Ana/San Diego, CA #3685 – Our client is an employee-owned and top ranked ENR firm with a long standing history in education/institutional, municipal, water resources, land development, and transportation engineering fields. Positions require 5+ years of experience planning and designing water & wastewater infrastructure projects. This company is continuing to grow and profitable, which shows in their strong ESOP program, and they offer a great work/life balance as part of their positive company culture. (#3685)

[Return to Job Listings](#)

Project Engineer – Site Development - LA/Santa Ana/Santa Clarita, CA #3682 - Civil Engineer/Assistant Project Managers positions are available in Los Angeles, Santa Ana, or Santa Clarita locations with an employee-owned and top ranked ENR civil engineering firm. This highly regarded company has a long standing history in education/institutional, municipal, water resources, land development and transportation engineering fields. Engineers with site development experience will be interested to learn more about this opportunity to work on a variety of public, private, and institutional projects. (#3682)

[Return to Job Listings](#)

Transportation/Bridge Engineer – Richmond, CA #3508 - Exciting opportunity to work on the **San Francisco Bay Bridge project**. Our client is a highly regarded consulting engineering firm that provides construction, engineering, and inspection services for transportation projects. The company culture is grounded in open communication, steadfast partnership and team collaboration. This foundation of trust translates into respect, agility, and originality for their clients. We are recruiting candidates with great interpersonal and communication skills, and capable of developing technical writing.

Requirements: BSCE, MSCE preferred, P.E., and 3-7 years of experience with large transportation projects, bridges preferred. We are looking for someone with experience with Caltrans practices and procedures, great interpersonal and communication skills, and capable of developing technical writing. PC and CAD skills are also required.

[Return to Job Listings](#)

Product Development Engineer – Sacramento, CA #3681 - Searching for a Professional Engineer with experience in new product development. This is an opportunity to join a world leading manufacturer of steel roof, wall, and deck products. It provides a chance to be a subject matter expert in innovative steel product development at a strong company that has been in business for over 40 years. This company provides a safe and satisfying atmosphere where they treat each other with trust and respect. People are able to maintain a healthy balance between work and family life. Through teamwork they are able to deliver superior products, service, and ideas. (#3681)

[Return to Job Listings](#)

Principal/Office Manager – Transportation – Sacramento, CA #3678 - Are you a leader in transportation planning who is ready to manage an office dedicated to improving the lives of Northern Californians? This is an extraordinary opportunity to join a firm that has established itself over 25 years as a leading transportation solution provider and often ranked as one of the best places to work. This leader will have the advantage of an established reputation combined with the market opportunity and management enthusiasm to grow. This is an opportunity for a leader with a passion for changing the urban environment and working with people who love what they do. (#3678)

[Return to Job Listings](#)

Surveyor/Survey Technician – Livermore, CA #3677 - An immediate opening for a Surveyor or Survey Technician with strong construction staking expertise. This is a great chance to join a firm who provides a compensation and benefits package beyond what we have been seeing in this industry.

The ideal candidate would have field and office experience on construction staking projects and have good CAD skills. Excellent plan reading skills is also important. Someone who is motivated and willing to work in a fast-paced environment would do well in this position. This is a perfect opportunity for an experienced field surveyor, who has developed good AutoCAD and computer calculation skills, to move into the office. (#3677)

[Return to Job Listings](#)

Environmental Senior Manager/Ecologist – San Diego or Irvine, CA #3674 - An opportunity for an environmental professional with experience in Marine and Fresh Water ecosystems; and a broad background in aquatic, terrestrial, and wetland flora and fauna. It's ideal for a professional with a strong presence in Southern California that may be open to being based out of the firm's Irvine or San Diego office locations. This opportunity is for a professional with expertise in Federal and California State regulations and permitting. They would also need to be capable of developing business with new and existing clients, and contribute to management and mentoring.

This is a great chance to join a strong international firm that is full of professionals who are on the cutting edge technically. They provide services to a variety of clients including Fortune 500 Companies, Ports, the Department of Defense, the Navy, and the Army Corps. The services their toxicology/ecology group provides include litigation support, cleanup of contaminated sites, sediment assessment, and environmental habitat restoration. The firm has a unique capability of bringing clarity to issues at the intersection of science, public health, business performance, and government regulation. Collaboration is key throughout the offices nationally and internationally, it's really the key to their success.

This may be for you if you are interested in joining a collaborative and international firm that doesn't have as many restrictive management layers as other firms tend to have at their size. The firm offers a great package including growth potential through mentorship and training, and competitive compensation and benefits. (#3674)

[Return to Job Listings](#)

Mechanical Engineer – San Francisco Bay Area, CA #3673 - Strong HVAC and building mechanical systems expertise required. Well-established and growing structural/mechanical engineering firm offers services for projects in the Western U.S, working with many of the nation's largest homebuilders, architects, and developers.

Ideally, this is someone in Northern CA who is open to commute to Sacramento 1-2 days per week until the new Bay Area office is established. There is current staff working in the Bay Area now, waiting for this important position to be filled to begin looking for office space. Contact our office if you are interested, or have someone in mind to recommend. (#3673)

[Return to Job Listings](#)

Engineer-Estimator – Oakley, CA #3670 - Our client is seeking a Geotechnical Engineer or Civil Engineer with geotechnical experience. This is an outstanding opportunity to not only design, but participate in estimating and executing foundation solutions with long-established firm with outstanding reputation. The firm is well known for innovative design in heavy projects utilizing driven pile, shoring, auger cast pile, helicals, drilled shafts, and several alternative proprietary pile types. This engineer will be critical to the design and to the execution of these projects. This is an employee-owned firm in Northern California with outstanding compensation packages and work environment conducive to long tenures and potential for career development. (#3670)

[Return to Job Listings](#)

Environmental Program Manager – Northern CA #3667 - An outstanding opportunity for an Environmental Seller/Doer in Northern California! This is a chance for a diverse and entrepreneurial-minded environmental professional to lead the growth and execution of a growing national consulting firm's business in the Bay Area, and even further throughout Northern California. The focus includes development, growth, and execution of a diverse array of environmental programs spanning due diligence, site investigation, remediation, permitting, compliance, CEQA/NEPA, and water resources management. Business development can be achieved through the combination of the new manager's existing professional relationships and collaboration about the firm's established network. This manager will be able to report and work collaboratively with the firm's Western Regional Manager, and will be able to participate in opportunities through that expanded region.

Someone with a proven track record of developing business, managing staff, and providing technical oversight of environmental consulting programs in Northern California can really thrive in this new opportunity. Please contact us directly if you are interested in this for yourself or if you think of someone you know.

[Return to Job Listings](#)

Geotechnical Engineer – Irvine, CA #3662 - Seeking mid to senior level Geotechnical Engineer in Irvine, CA. Exceptional opportunity to manage projects and work with clients on diverse and challenging building projects in California. Professional demeanor and client management experience required. Responsibilities include performing and managing projects, billing, reviewing the work of staff,

mentoring, managing performance and interacting with the firm's Senior Management team. M.S. in Geotechnical specialty, and California P.E. and G.E. license preferred. . (#3662)

[Return to Job Listings](#)

Civil Draftsman – Livermore, CA #3656 - We have a great opportunity for a Civil Draftsman/Technician to join a consulting firm that has been providing civil engineering and land surveying services to both public and private sector clients for decades. An ideal candidate will have 5+ years of experience in AutoCAD Land Development Desktop, and experience with Civil3D would be a plus. Someone with excellent communication, organizational, and team work skills is desired; along with experience including the drafting of topographic surveys, final maps, ALTA surveys, record of surveys, and plats for legal descriptions. If you are interested in joining a firm who is highly recognized in the industry and truly values their employees, this may be an outstanding opportunity for you. (#3656)

[Return to Job Listings](#)

Professional Land Surveyor – Livermore, CA #3655 - We have an excellent opportunity for a Professional Land Surveyor to join a consulting firm that has been providing civil engineering and land surveying services to both public and private sector clients for decades. An ideal candidate will have their California Registration and experience with AutoCAD and COGO programs, have excellent project management skills; and experience in the preparation of ALTA Surveys, legal descriptions, records of surveys, and parcel maps.

This position is ideal for a motivated individual who's a self-starter with excellent boundary resolution skills. If you are looking to further your career in a major commercial/industrial surveying environment with a firm who truly values their employees this would be an outstanding opportunity for you. (#3655)

[Return to Job Listings](#)

Civil Engineer – Livermore, CA #3654 - We have an outstanding opportunity for a motivated self-starter with civil engineering design skills to further develop in their career with a major commercial/industrial civil engineering and land development consulting firm. We are looking for a professional with the ability to mentor and manage, while being hands on in the design work themselves. AutoCAD experience is necessary, and specifically Civil 3D experience is preferred.

This is a chance to join a firm that has been providing comprehensive civil engineering and land surveying services to both public and private sector clients for over 40 years. Their compensation and benefits package is far stronger than what other firms are currently providing. They desire someone who is interested and capable of moving into strong senior management as they grow in their career, someone who is great at mentoring and working as the interface with clients on their projects. If you are looking to further your career with a firm who truly values their employees this would be an outstanding opportunity for you. (#3654)

[Return to Job Listings](#)

Senior Project Manager – Walnut Creek, CA #3651 - Are you a seasoned engineering professional in the SF Bay Area ready to take on a new challenge? This is an opportunity to build a transportation and municipal design group by leveraging the advantages of a firm that is highly ranked nationally but only has a small presence locally. The firm excels with the "seller-doer" model so this engineer should have excellent marketing contacts but also be capable of senior project leadership. This leader will also participate in developing the new group so experience with organizational development is an advantage. Please contact us to learn more about the exceptional opportunity. (#3651)

[Return to Job Listings](#)

Civil CAD Drafter/Designer - Roseville, CA #3643 - We are recruiting for an opportunity for a Civil CAD Drafter/Designer for a multi-disciplinary engineering firm in Roseville providing services in the areas of wastewater, water, drainage, flood control facilities, transportation planning and design, and site development. The firm offers a great company culture. Their clientele includes Cities, Counties, special districts, other engineering firms, architectural firms, and private development companies. This is an outstanding opportunity to learn and grow from a highly regarded group of engineering professionals in the Sacramento area. This employee-owned firm has young energy and a bullish future. (#3643)

[Return to Job Listings](#)

Civil Design Engineer – Los Angeles, CA, #3618 - Searching for a civil engineer with strong land development, design, and Civil 3D experience. This engineer will be involved in engineering plans and preparation, solving design problems, and other design tasks. This is a great chance to join a firm who is highly recognized in the industry. They are passionate about supporting ongoing professional development, and as result 65% of their employees have moved up through the ranks at the firm. This firm was recognized as the #1 Mid-Size Engineering firm in the nation in CE News Magazine's "Best Civil Engineering Firms to Work For" contest. If you are interested in joining a firm that values their employees and strives to keep them fully engaged, this may be a great opportunity for you. (#3618)

[Return to Job Listings](#)

Practice Leader – Stormwater – Multiple Southern California Locations, #3615 - Take a leadership role with an ENR top-rated firm. Develop and grow their Stormwater Quality & Watershed practice by leveraging their outstanding reputation and internal resources. This is a rare opportunity to excel by providing senior leadership for a firm that is already well positioned for growth. This industry leading firm has been established for over 60 years, and is known for producing award-winning, innovative, creative and sustainable projects. They serve public and private sector clients in the transportation, water, facilities, land development, energy, and federal markets. (#3615)

[Return to Job Listings](#)

Hydrogeologist – Sacramento Area, CA #3613 - Opportunity for Hydrogeologist or hydrologist to join a firm focused on quality, not size. This is a leading small firm in the Sacramento area with a specialty in groundwater related issues but they also are involved in a wide range of other projects. This is an opportunity to work with a firm that excels technically and places high value on balance of life. This is a family-focus, fun place to work with high quality and significant projects related to California's complex and pressing water issues. They are flexible about the amount of experience, but assume the successful candidate will have about 10 years of experience and be a PE or PG. (#3613)

[Return to Job Listings](#)

Project Manager – Site Development – Los Angeles or Santa Clarita, CA #3604 - Project Manager position available with a full-service, award winning, top ranked ENR civil engineering firm with a long standing history in the education/institutional/facilities, municipal, water resources, land development and transportation fields. The firm was founded nearly 70 years ago, with offices in California, Arizona and Utah.

We are searching for a strong Project Manager with experience managing concurrent projects for public and private clients. This is an exciting opportunity to work with a highly regarded, top-notch firm on planning, design and management of a wide variety of large and small scale private/municipal and quasi-public facilities with associated utility/roadway infrastructure. Offices located in Downtown Los Angeles, CA OR Santa Clarita, CA.

This firm has developed business approach to focus on clients' needs and guided growth to meet those needs. This approach is backed up by core strength in well-trained multi-disciplinary teams of experts. This firm has been ranked by CE News as one of the Best Firms to Work For. Position requires a B.S.C.E. and Professional Registration as a Civil Engineering in the State of California. (#3604)

[Return to Job Listings](#)

Senior Project Manager, Gas Pipelines – Clovis, CA #3587 - One of the Fresno Area's most respected civil design firms is searching for a gas pipeline design professional. The firm is well established with municipalities and agencies and gas pipeline design is a natural extension of their current offerings. This leader will help the firm grow in this niche because they have unique access to the large diameter, high pressure transmission projects. This is a unique opportunity to have the independence and satisfaction of working with a Regional firm that is small enough to offer advancement without bureaucratic obstacles yet large enough to have resources to execute projects. The office is located in a community with excellent schools and comfortable living. The emphasis of this position is engineering experience so a client base or business development experience is not essential. The ability to lead a design team is important. This is a great firm with an excellent reputation. (#3587)

[Return to Job Listings](#)

Design Engineer & Project Manager Opportunities (multiple) – East Bay Area & Sacramento, CA #3579 Working with a firm who has a great reputation of working on multi-million dollar site development projects in Northern California. They have mid to senior level site/civil opportunities for site/civil focused engineers in their East Bay Area and Sacramento offices. This firm presents the opportunity for support in career development, a friendly and supportive office atmosphere, and a chance to work on a wide variety of projects. (#3579)

[Return to Job Listings](#)

Senior Civil Engineer – Sacramento, CA #3578 - Senior Civil Engineer sought for leading Sacramento design firm. This CA PE will manage a wide range of projects. This firm is often cited as a great place to work and known for its solid leadership. This CA PE will manage land development and public infrastructure projects from entitlement to construction with emphasis on design. (#3578)

[Return to Job Listings](#)

Certified Engineering Geologist – Oakland, San Jose, or San Francisco, CA #3577 - Leadership role for a Certified Engineering Geologist sought for award-winning firm in the Bay Area. Location is flexible but this individual will be technically strong and comfortable with business development. This Seller / Doer will have strong experience in engineering geologic and geotechnical engineering field investigations and related projects. This is a well-respected firm that is poised to grow and offer career growth. (#3577)

[Return to Job Listings](#)

Senior Civil Engineer – Irvine, CA #3576 - Extraordinary opportunity for a Civil Engineer in Orange County. This is an opportunity to build business for a firm that is already well established in other services and is now well positioned to leverage existing business to build their civil offering. This is a "seller-doer" role. This registered engineer will have 10+ years of experience and be a proven successful professional. This office is poised for growth because of the success of other services in Irvine and the success of the civil group in other locations. This is a very well-respected and highly ranked firm with numerous awards. (#3576)

[Return to Job Listings](#)

Senior Engineer – Walnut Creek, CA #3564 - OWNERSHIP OPPORTUNITY with a full-service California Engineering firm focused in water infrastructure and public works facilities. Water/Wastewater engineers with a dynamic personality and entrepreneurial spirit are encouraged to contact us about this

opportunity to lead a growing office in the San Francisco East Bay Area. Business Development experience is a plus, but not required. (#3564)

[Return to Job Listings](#)

Civil Engineer – Redwood City, CA #3559 - Civil Engineers, this is an opportunity to work with one of the Bay Area's most respected and successful multi-disciplinary firms, located on the Peninsula. This is a design position for a registered engineer. This engineer will probably have at least 8 years of experience. This firm has a great reputation for being a progressive work environment and they have the highest quality projects in commercial site development and related projects. (#3559)

[Return to Job Listings](#)

Project Engineer – San Ramon, CA #3529 - A Contra Costa County based company is looking for a Civil Engineer who has at least 7 years of experience in the following: Completing Roadway Geometric and Vertical Profile Designs, completing Site Grading and Drainage Design, Hydrology and Hydraulic Studies, preparation of Tentative Subdivision Maps and Planning Documents, preparation of Improvement Plans, preparation of Grading Plans and Final Subdivision Maps, preparation of Construction Cost and Agency Fee Estimates, Topographic Surveys, Boundary Surveys, Construction Staking, interaction with clients and consultants, AutoCAD, and MS Office. This company provides a great atmosphere of energetic, enthusiastic, and experienced staff. The right person for this role will have the opportunity to get support in career development and for advancement within the company. (#3529)

[Return to Job Listings](#)

Project Manager – San Ramon, CA #3528 - There's an opening in San Ramon for a Civil Engineer with at least 10 years of experience in land/site development. They would be responsible for leading and coordinating the necessary tasks require to complete multiple projects in conformity to the scope of work. This includes the adherence to scope, budgets, and schedules. This includes the adherence to scope, budgets, and schedules. They would supervise the preparation of engineering construction plans, design calculations, cost and quantity estimates, drainage studies, and other technical reports. Also they'd coordinate and interact with agencies, sub-consultants, and clients. The goal is to deliver superior customer service to clients and maintaining excellent communication with all parties involved. There is great opportunity for advancement in this role where this individual could be responsible for leading engineers and developing clients. While client development is not a requirement when coming into this role, individuals with such experience would be preferred. (#3528)

[Return to Job Listings](#)

Senior Environmental Consultant – Irvine, CA #3521 - There's a great opportunity for a senior level Environmental Consultant to join an environmental consulting company in Orange County. This firm is interested in professionals who bring new ideas, energy, and initiative. They provide their senior level staff the autonomy and freedom to pursue the types of clients they desire to go after.

They are seeking an individual who has experience in the California environmental consulting market with strong client relationships that would enable them to bring business to the firm. Typical clients include law firms, manufacturers, technology companies, and property developers. The services they provide include site characterization, remediation design and implementation, and litigation support. Their company philosophy focuses on delivering value to their clients, building relationships in the larger business community, and maintaining a high standard for the quality of their work, which fosters a very beneficial reputation with local and state agencies. (#3521)

[Return to Job Listings](#)

Civil / Geotechnical Engineer, Northern California #3512 - Senior Project Engineer for tunneling group located in Sonoma, CA. Our client is a diversified, multidisciplinary organization providing a variety of

Earth and Environmental Sciences, Engineering, Mapping, GIS, and Construction Management Services to private and public sector clients. At their core, this employee-owned firm believes that innovation, creativity, and integrity are the keys to success. Creativity is a key in this role, as you'll be working on exciting wine cave and other tunneling projects. To learn more about this exciting opportunity with a firm that is highly respected and provides ownership opportunity through a beneficial ESOP plan, please contact us. (#3512)

[Return to Job Listings](#)

Project Manager, Pipe Line/Pump Station or Wastewater Treatment – Multiple Locations in CA #3474

Exciting and unique opportunity for mid-level wastewater engineers to move into an *ownership position* with a quality consulting firm. Multiple California positions are possible. Our client is a full service engineering firm that is looking for future leaders in their Northern and Southern California offices. [Return to Job Listings](#)

Remediation Engineer – Irvine or Los Angeles, CA #3469 - An exciting opportunity for a Remediation Engineer to join an international consulting firm in their Orange County or Los Angeles office. Looking for a dynamic, highly qualified, and ambitious individual with exceptional technical and client management skills to join the firm's site solutions team.

An ideal candidate will have experience in consulting with commercial and industrial facilities on remedial design and implementation, trouble-shooting, and site closure strategies. A management level professional with hands on experience in remediation is needed, not just conceptual design. This is a chance to join a privately held firm that doesn't have as many restrictive management layers as other firms may have at this size. Collaboration is key throughout the offices nationally and internationally, it's really the key to their success. The firm offers a great package including growth potential through mentorship and training, and competitive compensation and benefits. (#3469)

Structural Engineer – Boston, MA Area #3567 - Are you a structural engineer who prefers to be less of a desk-jokey and more of a problem solver? This is a unique opportunity for an engineer to be involved in the production of precise wood framing for high-end, often extraordinary, structures. This engineer will be equally comfortable with innovative structural design as with walking the shop floor. The firm has outstanding potential for growth and offers career growth for this hands-on engineer. Located near Boston, MA. (#3567)
