**California High-Speed Rail Project – Quality Assessor/Quality Engineer – Sacramento, CA #3773 -** We are recruiting for an immediate opening for the California High Speed Rail (HSR) Project. This exciting position assists in developing, implementing, and monitoring a quality management system for the HSR Authority. Our client was voted a 2015 HOT FIRM by Zweig Group and has been involved in many high-profile projects in the US and abroad. They are committed to providing Quality Management and Safety Management services as part of a long-term implementation program to deliver the 800-mile California High-Speed Rail Program connecting southern and northern California. This multi-billion dollar project includes final design and construction of the rail and civil infrastructure to support a 220 mph high-speed rail service. Contact us to learn more about how you can be involved with this high-profile project. (#3773)

Return to Job Listings

**Land Development Project Engineer/Project Manager – SF Bay Area & Sacramento Area, CA #3772 -** Opportunities for Professional Engineers with strong land development design experience to join a well-established and growing firm. This is a chance to be part of a passionate, forward thinking, and entrepreneurial team at a firm that provides services for residential and commercial projects as well as public works infrastructure. They are consistently recognized as an ENR Top 500 US Design Firm and trusted advisors in the industry. The duties in these positions may include working with leadership and project teams to perform grading designs, drainage, detention, and retention analysis and designs; water and sewer system analysis and designs; flood plain and erosion control plans; grading and paving

designs; constructability analysis and Opinions of Probable Cost; feasibility studies and permit processing. (#3772)

Return to Job Listings

**Senior Geotechnical Engineer – San Luis Obispo, CA #3760 -** This is an exciting professional opportunity that comes with the ability to live in a highly desirable location along the Central California Coast, and offers the possibility of a future leadership role, including shareholder. The firm is a progressive, diverse, and award winning geoprofessional services consulting company that has been consistently named by ENR among the top 500 engineering/design firms in the nation. They offer a mix of engineers, geologists**,** and inspectors. As the most predominant and well-respected geotechnical engineering and special inspection/materials testing firm in the area, they have an excellent market share and are able to propose successfully on the most desirable projects that are undertaken in the area. They work with local universities, community colleges, K-12 schools, hospitals and other health care facilities, public works, airports, hotels, industrial, transportation, and commercial projects. They also do some residential projects.

We are actively recruiting for a vibrant, self-motivated engineer who will maintain and nurture existing client relationships in the San Luis Obispo area, and develop new relationships with the next generation of client contact. Recruitment and training of staff and project level personnel are also part of this senior level role. We are seeking an individual who will be enthusiastic about helping the firm build an even better company for the future. Requirements for this position include: BSCE, CA PE and GE, and 10+ years of experience. The successful candidate will have technical competence and sound judgement in geotechnical engineering, special inspection, and materials testing. Excellent project management skills, written and oral communication skills, and interest in the potential for growth into a leadership position are required. We are seeking someone with personal characteristics that will allow for successful supervision of staff, as well as cooperation and effective interaction with colleagues and management personnel. (#3760)

Return to Job Listings

**Civil Engineer – Central Coast Area, CA #3759 -** Opportunity to join a well-established engineering consulting firm on the Central Coast that has the need for an experienced Civil Engineer with strong design experience and a California PE to join their land/site development team. This firm is able to provide a very healthy work/life balance, which could be a dream for someone who desires to live along the coast. They are top notch with their benefits as well. There is future potential to become a shareholder and take part in ownership at the firm. Their management style if very hands on. They empower their team members to be able to work independently, but also in a collaborative group manner. The company works on a variety of residential, commercial, public works, solar, and water treatment projects including storm water compliance, water, wastewater, grading, and drainage design. We are looking for someone with around 6-10 years of experience in the design and management of private and municipal projects to join this team. Local experience in client and agency coordination is also desired. (#3759)

Return to Job Listings

**Aviation Project Engineer – Orange, CA #3757** - Opportunity for an Engineer to join a well-established firm in their growing aviation team in Orange County. This firm offers an outstanding compensation package including 401k, profit sharing, a strong incentive bonus program, and the chance to work with an industry leader that will allow you to advance to your fullest career potential. They have been recognized by Fortune Magazine as one of the best places to work numerous times. Not only do they provide the ability to work on large and exciting projects, they also provide a fun and collaborative office atmosphere.

This role will provide support and management of exciting aviation projects. The right professional will provide engineering design work and planning support on airport projects, mentor and coordinate the work of other staff on various civil and aviation projects, and manage and deliver tasks under minimal supervision/guidance**. (#3757)**

Return to Job Listings

**Roadway Project Manager – Orange, CA #3756 -** Opportunity for a Civil Engineer with roadway project experience to join a firm that has been repeatedly recognized as one of the best firms to work for by Fortune Magazine. They offer outstanding benefits and compensation including 401k, profit sharing, a strong incentive bonus program, and the chance to work with an industry leader who allows you to advance to your fullest career potential. Not only do they provide the ability to work on large and exciting projects, they also provide a fun and collaborative office atmosphere. This is a great position for someone interested in becoming part of the project management team and growing into even more of a leadership role where they can contribute to the management of projects and teams, and develop client management and business development skills. (#3756)

**Electrical Engineer – Designer to Project Manager to Senior Engineer – East San Francisco Bay Area, CA #3753 -** An award winning electrical engineering and lighting design firm, in the East San Francisco Bay Area, is celebrating 40 years of experience in the industry. They have built a loyal clientele based on their ongoing commitment to client satisfaction and design excellence. An exceptionally fun, relaxed, and supportive work culture includes an alternative work schedule and continuing education reimbursement for their employees. This is a great opportunity for Electrical Engineers who have a passion for what they do, are eager to work on a range of projects, and enjoy managing transportation, commercial, and health care projects utilizing cutting-edge technology. Multiple positions available from Designer to Project Manager to Senior Engineer. (#3753)

Return to Job Listings

**Manager of Project Controls & Scheduling – Long Beach, CA #3708 -** Are you a Project Controls professional with a strong technical background in Project Cost Control and Estimating – and demonstrated managerial skills related to managing a group? If so, we have an excellent opportunity to manage the Project Estimating and Project Controls group of one of the outstanding West Coast transportation authorities. Work for a dynamic new leader of the Department on some of the most interesting and dynamic multi-modal projects. These are world-class projects and construction plans far into the foreseeable future. You should be familiar with Primavera, P6, Unifier, and other Project Architecture and WBS formats. Most importantly is the ability to successfully lead people. (#3708)

Return to Job Listings

**Senior Land Surveyor – Pleasanton, CA #3750 -** Searching for a Senior Land Surveyor on behalf of a well-established and growing land development consulting firm with a passionate, forward thinking, and entrepreneurial team. Their goal since the beginning has been to build a brand that has a solid reputation creating longevity with their clients and they have succeeded in becoming, and are continuing to be, a trusted advisors in the industry. The leadership at the firm has a results oriented

approach and is keen on allowing people to grow to their fullest potential and desires. They provide support and guidance by leading from up front as opposed to managing from behind.

Seeking a like-minded professional who wants to take on this leadership role in surveying at this collaborative firm. This role encompasses contributing to business development, technical leadership, and management of the surveying team. As an essential member in the team, the focus in this role will also include the oversight of survey work, coordinating with clients and other managers, and coordinating with field personnel. (#3750)
