

Kimberly Pease, CISSP
Vice President
Citadel Information Group, Inc.

Ms. Pease has an extensive background in the applications of technology and Information Security Management for middle-market companies. During her career she has implemented computer systems for a wide-range of organizations in the United States, Canada, and Europe. Additionally, she has led installation projects at the Pentagon, the Government Printing Office and many state government offices.

As a former *Chief Information Officer* for *Pictorial Offset Corporation*, a high-end middle-market commercial printing company, Ms. Pease's leadership of the IT Department provided competitive advantage to the company. A member of the firm's Steering Committee, she led the company's ISO 9002 and ISO 14001 initiatives, ensured Y2K compliance and achieved corporate-wide technology standardization. Additionally during an interim 7-month period, Ms. Pease was Acting Chief Financial Officer.

Prior to joining *Pictorial*, Ms. Pease was on the staff of *Logic Associates*, a software development company providing integrated business management systems for the graphic arts industry. While with *Logic*, she worked on-site with clients implementing business management systems. In addition to training and supporting users, she led Quality Action Teams on several projects. Later during her tenure at *Logic*, she was selected to open up a West Coast Sales operation in *San Francisco, CA* creating an expanded marketing and sales presence for the company.

Ms. Pease and her business partner, Dr. Stan Stahl, co-founded *Citadel Information Group* to assist organizations more effectively secure their critical information assets. The company provides information security management services to business and the not-for-profit community.

Ms. Pease has been a member of the *Los Angeles Chapter* of the *Information Systems Security Association* since 2002, is past Treasurer (2008-2011) and past Education Director (2006-2007). She has been a member of *Infragard* since 2002, which is a partnership between the *Federal Bureau of Investigation (FBI)* and the private sector. She speaks frequently on information security and has published several articles and has been interviewed several times by ABC News and Good Morning America.
