

Inspiration for a Yoga of Synthesis

The Seven Rays manifesting at the peak of their potential, sound forth in time and space as a harmonic chord. That chord expresses the perfect equation of Synthesis, which is Logoic Purpose manifesting as the Plan. Each person is a focal point for the manifesting creation of Logic Purpose.

The Law of Correspondences as expressed in geometrical patterns and numerical progressions ever enables the understanding of the Purpose and Plan of the Planetary Logos. These were established before the worlds were created and find their prototypes on the Kosmic mental plane.

As initiates we attune our consciousness to planetary, systemic and certain cosmic influences. We become a lens through which the many Lights which are Energy itself can stream. Thus we are planetary servers.

Progress towards right understanding of cyclic living will come with meditation on the twelve signs of the zodiac. As the world adjusts to a more stable rhythm, these meditations brighten the web of life to produce more effective spiritual living.

**As we engage in the process of cyclic living
we are moving into our place within Synthesis
of the Life of our Planetary Logos.**

A Yoga of Synthesis Fire Meditation

ENTER INTO GROUP ALIGNMENT

As consciousness standing midway between Spirit and Matter, contemplate the Triangle:

- Spirit as a point Blue-White Fire;
- Consciousness as a point of Golden Fire;
- Matter as a point of Violet Fire.

Merge the Three until there is One point of Fire.

This is the DEVA OF SYNTHESIS – the perfect equation between Spirit, Matter and Consciousness; the precipitating Agent of the Divine Plan for any life It contacts.

Visualize the descent of the DEVA – the perfect Fire – into the outer life and affairs of this group life. See it consuming the forms of the outer life and affairs from within:

- Giving to each form the life of service as it is consumed;
- Aligning it perfectly with its higher counterpart and the Purpose for which it was created;
- Transmuting all opposition to the Divine Plan into active service to the Plan; and

In the consummation of the form, know the perfect Sounding forth of its Note,

Sound the OM

Align with:

- The Ashramic Group Life and its Focal Point;
- The Overshadowing Christ;
- The Planetary Logos;
- The Avatar of Synthesis;

Creating within the Etheric Body of the Logos on all levels of vibrating matter, a Center of Synthesis.

Sound the OM

Visualize:

- Alignment between the Planetary Logos, Logos of Venus and Logos of the Spiritual Sun.
- The Alignment of this Solar Triangle via a higher Cosmic Triangle with the Cosmic Christ.
- The movement issuing forth from the Cosmic Christ of the Note of HIS Purpose within the impulse of Synthesis.
 - Contemplate the movement down the Alignment from the Cosmic Christ – that perfect FIRE which we identify as Synthesis; and
 - Bring it into focus within this Center of Synthesis in the Etheric Body of the Planetary Life.

Visualize the threefold Fire within the Center and focus it into the life and affairs of humanity whose function is to fulfill the Purpose of the Planetary Logos.

Sound the om

Living the Energy of Libra

LIBRA is the energy of equilibrium bringing about the balance between the pair of opposites, the inner and the outer, the higher and the lower. It nurtures the poise that allows one to invoke and to evoke, that yields synthesis, and that produces the empathetic understanding that is compassion. It brings an interlude of balance as a prelude to a more effective and sensitive progress on the path. Libra is a cardinal air sign focusing Venusian and 5th Ray Energies. The 7th Ray working through Uranus rules Libra embodies the principle of concretion and materialization of that which is in need of objective manifestation, through the bringing together of Spirit and matter. Libra is constantly spinning threads of relationships, creating a sensitive network of meanings that result in synthesis. Ray 3 in Libra weaves the threads of relationship between the pairs of opposites in the zodiacal wheel to bring all into balance in Divine Law and Order for the cycle under consideration.

Libra is the zero point through which consciousness relates Spirit and matter with a growing sense of awareness. The key words for this energy are poise, equilibrium and synthesis. Poise is characterized by a quiet interlude. This can look like inertia, but gives the opportunity for self-actualization. Grace is an aid in achieving the point of balance. The balance is dynamic, like an ice skater in a perfect spin. It has a tension that moves one to the recognition of synthesis, of transformation. The gradual process of interior transformation changes the way we experience Life and brings in a new quality of information- a higher understanding of the pairs of opposites. Thus a restructuring of consciousness takes place.

Libran energy is an expression of totally accepted relatedness placing the group as the negative polarity of the Cosmic Christ. Once one accepts the relationship with Will, there is the ability for much more authentic and fearless giving of self. The influence of Libra should be in childhood along spiritual lines, Right relationship, self control and unselfishness require adult support. The result is that every person may know him or herself to be a valued member of society.

I choose the way that leads between the two great lines of force.

INVOCATION-EVOCATION is the method whereby the desired relationship is brought about between all units of life in order for the process of the Science of Impression to take place in Divine Law and Order. Spirit and matter, consciousness

and understanding, subjective and objective living are brought together in a new relationship of Divine Polarity. A seed for the new pattern of civilization is planted.

Choosing to blind oneself to the lower mind's illusions, higher focus on the part of the individual is required to achieve the balanced poise of Libra which creates an opening through which the energies of the Cardinal Cross can flow. Resting in this interlude, a fullness of alignment occurs. Poised between being and doing, in deep steadiness, subtler choices are presented giving one more creative freedom as we recognize Soul's purpose, the weaving of new archetypes through which the Plan can manifest. Knowing that Spirit and matter are a polarity pervaded by consciousness, one recognizes the power that right choices yield. One moves up the spiral between matter and spirit, between the individual will and the collective to achieve the balanced middle way of the Christ Consciousness which is the individual, monadic divinity of each spark of consciousness.

*I stand receptive to that Divine Intelligence
Which produces the activity of the Plan.
Right action is revealed to me and
I am made whole.*

Living the Energy of Scorpio

All spiritual seekers know the Energy of **SCORPIO** for it rules the Path of Discipleship. Focusing 6th Ray Energy through Mars, it is also called the sign of testing. The tests are 9-fold: sex, comfort, money, fear, hate, ambition, pride, separateness and cruelty. We learn problems must be solved from a higher level than they appear. The purpose is not pass/fail, but to temper the seeker who becomes strong as steel in the one-pointed pursuit of Truth and Service. Tension, crisis, triumph is the method. The theory of dissipative structure applies. According to the theory a system [individual] takes in more and more energy [tension] until it falls apart [crisis]. Then the system reorganizes at a higher level of sophistication [triumph]. In the case of the spiritual seeker one must remember that energy follows thought, and it is those choices/decisions made at the time of crisis that determine the quality of triumph. Ray 4 in Scorpio brings the Beauty and Harmony of the Higher into the lower.

The mediating consciousness is the Beautiful Warrior who guides one through the battle between the soul and the persona. Scorpio energies deepen our understanding of the sacred Path of the Spiritual Warrior, penetrating even further into that which is hidden, while transferring power from ‘below’ and lifting it into the light as we embody ‘higher’ energies. One learns detachment, perspective and Trust as the patterns are perceived that give coherence to life. Applying the Will-to-Love and the Will-to-Listen, one achieves that transmutation that leads to the harmonization of the personal with the Soul.

Warrior am I and from the battle I emerge triumphant.

ALIGNMENT establishes the Center of Synthesis within the body of our Planetary Logos and within the three worlds of human endeavor. Alignment is the tool of the warrior. It is not necessary to look away from or beyond discord to find harmony. Beauty and Harmony are everywhere equally present in essence, and are made visible via recognition and invocation.

Alignment is the key to success in Scorpio and through it we discover the importance of the group in doing this work. Every new point of balance requires a readjustment of the alignment in concert with all that we know and are experiencing. Beauty is a primary theme, evoking our skills in communication and creativity.

*I stand receptive to the Sound of the Overshadowing Soul.
Aspire to sense the frequency of that Silent Sound,
To understand its meaning,
And to then reproduce it harmonically
Within the world of the persona,
Realizing that this vibration,
This harmony
Is an attribute of the Soul.*

Living the Energy of Sagittarius

SAGITTARIUS is a mutable fire sign that is ruled by Earth and the 3rd Ray. The energy is characterized by one-pointed aspiration. It leads one to discover the power within oneself to make progress on the path through control and right use of thought, leading to right use of speech. Conflict is brought into the life because six of the seven Rays reach the individual directly or indirectly through this sign. Thus, Sagittarius is about learning to multitask and integrate all one's efforts toward a single goal. Then the energy pauses; there is rest. Then another goal is sensed and the effort begins again! In this process Sag teaches what is true for one; but that truth is not for all. However, all truths lead to the One Truth. With Rays 1, 2, 3, 4, 5 & 6 all pouring into humanity through Sagittarius, Harmony through Conflict is ceaselessly active. The intensity of destruction that brings change emphasizes the necessity to harmonize the new goal with the foundation of the past. A one-pointed intelligent common sense is brought to the process of change. A dynamic fire of devotion to the next step in the manifestation of the Divine Plan for humanity characterizes every disciple.

Sagittarius is a multifaceted energy that demands alignment, silence and detachment. It pulls the individual towards intuitive perception which yields Creativity and Joy. To enter the energy is to align in aspiration with ongoing evolution, a process of integration and synthesis.

I see the goal and I reach that goal and then I see another.

PURPOSE within each cycle sets a goal for Service for every disciple and discipleship group – each making their own contribution to the manifesting Divine Plan for humanity. Purpose known to consciousness is sensed as an ideal and then formulated as a goal. Service is a series of divine acts and States of Consciousness to be made manifest throughout one or more incarnations.

Alignment, vertical and horizontal, leads to Wholeness, the synthesis of Being and Becoming or Fullness of Self, in which the Silence deepens and new energies pour in. Consciousness is the witness of the union of Spirit and Matter, infusing its instruments with the Archetypes in closest relationship with our Planetary Logos. Thus the vision shifts to a higher turn of the spiral, the individual comes into conscious relationship with the stars, and one chooses new, higher purpose.

*I stand receptive to the Divine Ideas of the Soul,
before they have taken form.
I listen to the Sound of the Overshadowing Soul.
I respond to the downward and outward movement of the Soul
which produces its inward and upward growth.
Thus the consciousness knows in actuality,
a perfect equation of Synthesis
– of Spirit, Matter and Consciousness.*

Living the Energy of Capricorn

CAPRICORN is a cardinal sign [the cross of Spirit] ruled by Saturn. It focuses the 3rd Ray with the addition of the 5th Ray when we are ready to implement mental discernment. Capricorn is said to guard the secret of the Soul itself and is the door to identification with Spirit. In this sign Saturn reveals the nature of intelligent substance, Venus reveals the nature of intelligent love and the Earth reveals the synthesis of the two. The energy moves in a spiral bringing in something new requiring effort, strain and struggle, forcing the individual to go deeper and deeper inward until s/he emerges at a higher turn of the spiral. The cycle repeats and repeats until one discovers that the Kingdom of God is within and one identifies as a Spiritual Being.

The energy of Capricorn draws us upward and inward beyond the silence that is the quieting of the mind and into the Silence that is the journey Home. Simplicity and attention to structure are required to perceive the needs calling for conscious action. One must accept the Power that enables the Will- the willingness to manifest Purpose.

Balance yielding no distortion, no karmic reaction and allowing expression of spiritual integrity- that synthesis of the highest and lowest one can experience which leads to fusion of the personal with the group, the soul with the Monad. Silence beyond silence, beyond the stilling of the mind, strengthening and leading different, more inclusive realms. Awareness of spiraling cycles within cycles and the patterns they generate. These along with the Will that transmutes and sustains, that draws us into relationship not only with Earth, but also the Solar Logos so that we may glimpse Purpose characterize the energy of Capricorn.

Lost am I in light supernal, yet on that light I turn my back.

SPIRITUAL INTEGRITY sets the quality of disciples' Ashramic Service Relationships into all aspects of their activities and relationships. Spiritual Integrity is born of Right Identification. Let your recognition of the One bring the many voices into synthesis within the I Am.

Rays 1, 3 & 7 in Capricorn set the Divine Will of our Solar Logos and His relationships within the Solar System into right relationship with the Intelligent Substance of His body bringing about the dynamic manifestation of His Purpose for this cycle.

*I stand receptive to the Purpose, Power, and Will of God
as it is stepped down to me from my Soul.
I serve that Purpose, accept Its Power, and do the Will of God.
Right action is revealed to me and I am made whole.
I stand receptive to the precipitating Will
from the level of the Overshadowing Spiritual Soul
into my consciousness, and in turn,
a further precipitation of Divine Will
into the substantial forces of my bodies via my mind.*

Living the Energy of Aquarius

AQUARIUS is a fixed air sign initially focusing the 7th Ray of Magic through Uranus and then adding the 2nd Ray of Love/Wisdom. Though part of the cross of fixed purpose, it is an energy characterized by constant motion, changing activity and recurrent mutations leading the individual through opportunities presented to illumination and group awareness. As the individual focus becomes more outgoing, Aquarius relates and binds together Spirit and matter, Soul expression and Spiritual consciousness, the field of service and the mode of attaining the goal into one working and synthetic whole. Life and Love stream through this sign; Aquarian Energy brings one further and deeper into group orientation, group consciousness and Service.

The purpose of the Fifth Ray is to produce the equation of Spirit, Matter and consciousness into such movement as to result in an experiencing (which we call evolution) by every atom of consciousness of all that is possible to the sum total. thus the consciousness knows in theory and actuality all that is possible to it from the lowest to the highest State of Being.

This energy brings about a distinct shift from the Silent Stillpoint of Capricorn which prepared us for the change. Characterized by movement, the creative nature of Aquarius relates one to Love and the Freedom involved in creativity relates to Life. In the process we learn to work with the Law of Attraction and Repulsion, which brings us into understanding the significance of cycles. The dynamic energy called Aquarius expands the consciousness, enabling one to enter the Group state.

In deep Silence Aquarian energy promotes the attunement and interplay of the persona's meditation with that of the Soul until the two are one, thus increasing our ability to practice the science of impression and to focus expansion of consciousness it strengthens the group as well as group awareness and promotes synthesis in activity.

Water of Life am I, poured forth for thirsty men.

WHITE MAGIC is the Service responsibility of the Conscious Spiritual Soul incarnate within the etheric body of humanity. Each person sounding the note of his true identity as Soul – then as Monad – is what humanity is thirsting for. This is

the Plan made manifest in Aquarius. Humanity is the vessel through which the Creative Word and all that is Good, True and Beautiful pours into the lower planes.

Ray 5 in Aquarius brings *knowing* in contrast to faith into the consciousness of humanity. We know the beauty of our inter-relatedness, our place and purpose, within the One Life and our realization of Being takes on a dynamic one-pointed sense of unique response-ability.

*I stand receptive to the downward and outward movement of the Soul
which produces Its inward and upward growth.*

The purpose of the 5th Ray is to produce the equation of Spirit, Matter and Consciousness into such movement as to result in an experiencing (which we call evolution) by every atom of consciousness of all that is possible to the sum total. Thus the consciousness knows in theory and actuality all that is possible to it from the lowest to the highest State of Being.

Living the Energy of Pisces

PISCES is a mutable water sign focusing the Second Ray of Love/Wisdom through Jupiter into our world. On the Path of conscious evolution additionally the energy of Divine Will is focused through Pluto and works to direct the fluid, sensitive temperament of the aspirant to become responsive to Soul impression. The process awakens the individual to awareness of Spiritual Being while in the physical form, thus generating a sense of being pulled apart in opposing directions, yet unable to let go of either. In this push/pull/transformation process the understanding and the use of the Divine Will necessarily become an integral part of the individual. When the persona has reached a point of purification, of dedication and of illumination, the attractive power of the Soul can function. First fusion, then synthesis of the two will take place.

I leave the Father's Home, and turning back, I save.

FIRE OF SYNTHESIS is Three Fires as One Fire, the Deva of Synthesis. This Deva constitutes the perfect equation between Spirit, Matter and Consciousness and is the precipitating Agent of the Divine Plan of any Great Life with Whom It is associated. Christ within humanity must be the directing Agent of the sacrificial Fire of Synthesis – that Fire which consumes the apparent barriers between the many frequencies of Life.

The fluidity of Pisces demands that the will be engaged in order to hold one's focus so that the purification process can occur. From that still point one becomes aware of the multiple, interlacing cycles of life that push and pull us invoking Balance- the integration of Wisdom and Knowledge, the synthesis of Spirit and matter. Trust in the process is essential.

As Piscean energy purifies, the current serves to bind the higher being to the lower creating its body of expression, a necessary process in our evolution. Meditation creates the space, Intention generates the process as Purposeful Being and Living is realized.

Rays 2 & 6 in Pisces emphasize Cosmic Divine Love-Wisdom and the Ideal of Right Relationship within and between all Beings, all expressions of the One Life.

*I stand receptive to the Divine Ideas of the
Overshadowing Spiritual Soul
before they have taken form.
I stand receptive to that Love which is my Soul and
Truth is made known to me.*

The old form is sacrificed, its Truth revealed and clothed anew in the Fire of Synthesis. Truth is carried forward to the next cycle of creation.

Living the Energy of Aries

ARIES, a fire (mental energy) sign on the cardinal cross, is the gate through which the First Ray Energy of Will enters the Planetary Life. It is the energy of birthing ideas, new beginnings, reorganization, reorientation, repolarization and regeneration, and is very dynamic. Ruled by Mars and the Sixth Ray of Idealism, the energy also focuses through Mercury and the Fourth Ray of Harmony through Conflict. Hence, one attains through strife and/or through vision. The nature of Arian Energy can be described as creation, being, activity, strife leading to synthesis. Aries creates activities, conditions and processes leading to the manifestation of Soul in form, then Spirit through Soul with Life pervading and synthesizing them all. The purpose of the tests of Aries is right use of mind and mental control.

Right use of mind is essential to meeting the dynamic shifts, the energetic changes filled with Purposeful potential which characterizes Aries. One must renounce the outworn to recognize the new, which readjusting constantly to the inflow of Spiritual Will. Intent and discipline enable the power of directed purpose that brings the change toward incarnated spirituality.

I come forth and from the plane of mind, I rule.

Via **IMPOSED RHYTHMIC CONTROL** a disciple assumes his own area of responsibility in the network of all relationships and carries out his purpose as a cooperative leader within the Divine Plan for humanity. In Aries we synchronize our heartbeat with the Pulse of the Cosmic Heart.

Rays 1 & 7 in a dynamic relationship in Aries bring the Purpose of the One Life directly into every manifesting aspect of our Planetary Life and Affairs in ever-increasing Power and Potency.

*I stand receptive to the Purpose, Power, and Will of God
as it is stepped down to me from my Soul.
I serve that Purpose, accept Its Power, and do the Will of God.
I stand receptive to the precipitating Will
from the level of the Overshadowing Spiritual Soul into my consciousness,
and in turn, a further precipitation of Divine Will
into the substantial forces of my bodies via my mind.*

Living the Energy of Taurus

With all Seven Ray Energies reaching the individual directly or indirectly through **Taurus**, it produces constant activity on all levels. A fixed earth sign, its essential nature is desire in all its forms, from the lowest most selfish expression to the Divine Will, which we know as the Will to Love and Goodwill. Thus, this energy can produce a feeling of being pulled in many directions. Through the ruler Venus, focusing the Fifth Ray of Knowledge, the individual is led from an outward focus by shedding light on the inner. On the Spiritual Path Vulcan focuses a will that takes one to the depths of concrete experience in the natural world and forges the vehicle for Soul expression by bending the will of the personal to that of the Greater Self. Through the use of creative force the disciple learns right understanding of the Law of Attraction as well as the right use and control of matter always with the goal of illumination.

Taurean energy focuses and grounds the Will of God in the three worlds of humanity. Dynamic, yet stable, on receiving the energy one stands in isolated unity, yet knows s/he is not alone. Intuition, realization, stillness and joy characterize the energies, enabling one to focus more intensely and leading to directing, rather than just receiving illumination.

I see, and when the eye is opened, all is illumined.

CREATING RIGHT ECONOMY necessitates setting the right intent and relationship between our Divine Economy and every aspect of our daily life and affairs. Let your eye be single in the use of Economy.

Ray 4 in Taurus sees clearly the Beauty and Harmony of the Divine Economy of the One Life and demands an imposed rhythmic control of all the devas of the three-world economy to likewise be in perfect harmony with one another.

I stand receptive to the Sound of the Overshadowing Soul.

Aspire to sense the frequency of that Silent Sound,

To understand its meaning,

And to then reproduce it harmonically

Within the world of the persona,

Realizing that this vibration,

This harmony

Is an attribute of the Soul.

Living the Energy of Gemini

GEMINI is a mutable air sign focusing Love/Wisdom. The rulers are Mercury focusing the Fourth Ray Energy of Harmony through Conflict and Venus focusing the Fifth Ray of Scientific Knowledge. Together they indicate work on the mental plane. Characterized by fluidity of mind, Gemini gives us the energy needed for the evolution of consciousness. Its rhythm is a pulsating attraction and repulsion leading one to attempt to resolve duality into synthesis. The struggles and difficulties of the motion will ultimately yield full group and then planetary consciousness. The opportunity and the challenge of the one on the Path are to give this very fluid energy the structure that results in alignment of body, Soul and Spirit.

Gemini brings a dissonance characterized by extreme fluidity of mind as well as a very stable groundedness. That fluidity serves to break down old patterns of being in order to bring body, soul and Spirit into the Right Relationship which is Love. The individual can then re-pulse Love energy into her/his sphere of influence. Joy, Creativity and Life More Abundant bring a feeling of anticipation as we enter a New Age. Inclusive, expansive Gemini provides a field of Love/Wisdom that facilitates establishment of right relationship (not only with people, but also creatures, things, processes even energy itself) through intuitive and illumined living.

I recognize my other self and in the waning of that self, I grow and glow.

COMMUNICATION IS CREATION. The communication of Deity creating Deity fills the void with sound and reproduces a unique Harmonic. Every person is a sound, a being – a unique, intrinsic and harmonic note within the Word of a greater Life. When each note of a Total Word sounds its intrinsic harmony, the Great Being Whose Name It Is becomes Centered within the Greater Being of Whom It is a Communication.

Ray 2 in Gemini carries the purest expression of Cosmic Love-Wisdom available to our Solar System – this is the expression of the Cosmic Christ. Humanity is the vehicle through which the Planetary Logos is bringing Cosmic Truth into focused expression.

*I stand receptive to that Love which is my Soul and
Truth is made known to me.*

Living the Energy of Cancer

CANCER is a cardinal water sign focusing the Fourth Ray of Harmony through Conflict. The Sixth Ray of Idealism is dominant. Called the sign of rebirth, the nature of the energy is to nurture the Divine Spark within the form, first as instinct, then as intellect. Cancer also nurtures the forms and the feelings through which the Soul is awakening to the three worlds of physical, emotional and mental activity and comes to know God in manifestation. On the Path, Cancer acts as a magnet for the transformation of intellect to intuition. We are told the Soul reaches the individual at first through the emotions. Thus this watery sign provides a direct conduit through which the individual can be touched. We recognize this energy both as a nurturance of all that is best in us and then as a divine discontent that pushes us forward. The Energy of Cancer develops and requires correct use of instinct, intellect and intuition.

With sure alignment that connects to Source we build the lighted house that is humanity's new civilization. As the crab sloughs its shell, we release outworn and negative thought patterns in order to joyfully build a fluidly responsive instrument for Monad using the Law of Attraction- Love and Re-pulse action.

I build a lighted house and therein I dwell.

EMBODIMENT: Spirit sounds Its Note and moves into matter resulting in the phenomenon we call Light. Soul is the realization of this Divine Relationship. The process of liberation of the imprisoned consciousness serves the parallel evolutions of deva and consciousness. Both seek to build a vehicle capable of embodying realization of the fullness of self.

Rays 3 & 7 in Cancer are Intelligent Activity manifesting within every aspect of the three-fold human instrument eventually bringing about the realization of that Lighted House which is our contribution to the living expression of the One Life.

***Right action is revealed to me and I am made whole.
I stand receptive to the precipitating Will
from the level of the Overshadowing Spiritual Soul into my consciousness,
and in turn, a further precipitation of Divine Will
into the substantial forces of my bodies via my mind.***

Living the Energy of Leo

LEO is a fixed fire sign ruled on all levels by the Sun and therefore intensely focusing the Second Ray Energy of Love/Wisdom. Experience within this facet of the energy reveals the need to discipline ourselves, thus purifying and allowing for intensification of Light. The Love/Wisdom focusing through this sign guides the persona towards knowing the self in relation to others, to the environment and the world, to the soul and to Spirit until deep sensitivity is developed and true awareness of the Self is reached. Leo works to establish the ego and then leads from egomania to a healthy love of Self that recognizes and later identifies with others. A magnetic loving energy, it fuses, blends, amalgamates and synthesizes, strengthening the individual and later the groups/Group in which we find ourselves.

Leo's dynamism as it shatters (1st ray) outworn patterns and attracts (2nd ray) the new requires a focused stillness in order that the persona and Soul can merge more completely and that one can turn consciously (5th ray) towards Monad.

I am that and that I am

ALIGNMENT: FUNCTION, RESPONSIBILITY, LEADERSHIP

Our alignment is a component of the Great Alignment of Beings from the ONE ABOUT WHOM NAUGHT MAY BE SAID to the Cosmic Christ, to our Solar Logos, to the Triangle of the Avatar of Synthesis, our Planetary Logos and the Christ; from Shamballa to Hierarchy to Disciples in the three worlds of human endeavor to humanity and the lower Kingdoms of Nature. Each Being takes responsibility for a function and thus is a cooperative leader. This is the Divine Law and Order of Life.

Ray 1 focuses and interprets the Cosmic Ray of Love-Wisdom. **Ray 5** analyzes and organizes the incoming Energies to facilitate their practical utilization in every aspect of their applicability.

*I stand receptive to the Purpose, Power, and Will of God
as it is stepped down to me from my Soul.*

*I serve that Purpose, accept Its Power, and do the Will of God.
I stand receptive to the downward and outward movement of the Soul
which produces its inward and upward growth.*

Living the Energy of Virgo

VIRGO: the most mysterious of all the signs. Virgo is the earth sign of the mutable cross and focuses the Fourth, First and Second Ray Energies. One's experience in this sign is made more complex because eight other signs pour their energies through Virgo via their ruling planets. Furthermore, Virgoan Energy is difficult to recognize because it nurtures those deep experiences and processes begun in the depths of one's being; the light of understanding increases via slow, gentle, yet powerful crises and periodic developments that ultimately lead to the expansions of consciousness. Just as a mother is focused on the child during pregnancy, Virgo's Energy leads us to focus on our inner being, the Soul and its worlds. As energy follows thought that inner Being is nurtured and relationship is established with it in order that it can be birthed at the appropriate time in the three worlds of human endeavor. Virgo concerns the whole goal of the evolutionary process, the Christ Consciousness, and its process is synthetic. The individual using Virgo's Energy steps toward union with both Spirit and matter. The lesson is that no truth is complete or even real which does not include its opposite and all that occurs in between.

Virgo requires an intense focus with attention to detail that brings us into conscious relationship with the essence of synthesis-the Christ within. Every single action in the three worlds of human endeavor must become sacred acts manifesting the consciousness of the soul. Virgoan energy has the capacity to render this a beautiful experience. The resultant new felt energy/frequency/presence is the birthing into full expression via humanity of the seed of the next kingdom to manifest on Earth.

I am the mother and the child, I, God, I, matter, am.

DIVINE ADJUSTMENT & EMPATHY: From our focus within Ashram and our higher alignment we release into the consciousness and life and affairs of humanity that Divine Adjustment that is needed to transmute opposition into opportunity. With empathy for the condition of humanity, prisoners within form, we are instruments of the Grace of Christ, relieving fear and sorrow and providing hope and joy.

Ray 2, Love-Wisdom, can only be truly understood via experience – experiencing Love within each of the three planes of human expression and then knowing Love within Ashram. **Ray 6** enables us to maintain the Fire of Steadfastness and Devotion to the Divine Plan for humanity and our service relationship within the Plan.

*I stand receptive to the Divine Ideas of the
Overshadowing Spiritual Soul before they have taken form.
I stand receptive to that Love which is my Soul and
Truth is made known to me.*
