

WORKING WITH KRISTINA – What's it like?

In September 2012 I asked through **an anonymous survey** what my clients and readers thought of *Personal Growth Gab* eblasts as well as my speaking and coaching services.

I thought I might share a few of the written responses about my style here; **if you were thinking of working with me as a coach it might give you a better idea of what to expect.**

With over 50 comments from the survey results to choose from, some themes definitely emerged and I've tried to capture them here - hey, at least I'm consistent!

*She has a laid-back approach, but don't let that fool anyone. **Her ability to read people is amazing and her assessments of how a person can enrich their lives/careers are spot-on.** After she asked me lots of questions, she was somehow able to give me an assessment that was frighteningly accurate and illuminating.*

*She's really understanding and inspiring. Coaching sessions are not a simple "make your resume look like this and you'll get a job" - Kristina gets to the bottom of your issues and brings them to the top. **I always leave a session feeling refreshed and inspired.***

*Kristina is a special person with a singular passion for empowering people to get the most out of their lives. Most notable is **her rare quality to really get to the root/essence of a person/issue** and make people feel as though they are being focused on deeply and solely---she is not thinking about anything other than YOU and your situation and what she can do to help guide and make things go on a better path.*

*I thank Kristina for looking beyond the descriptions of what I've told her regarding my current situation when advising me. **Kristina looks at what you don't say as opposed to what she thinks you want to hear.***

***I appreciate the way Kristina can blend all the facets of life/career** from the corporate world to astrology to physical health-she has a bird's eye view of all these realms and more which make her very helpful to me. Like a really smart Mom.*

***Kristina does business with HEART.** Her insight and intuition are very strong. She cares very deeply when she works with you and you feel very taken care of.*

*She never deals with the "surface" issues. **She makes you delve deep to get at the root issue to put you back on the right path for it to no longer be an issue in your life.** She makes the personal work just as important (sometimes more important) as professional/business stuff. I BELIEVE she wants the best for me and that I'm not just another client.*

***Her no nonsense way of relating information.** In my experience, Kristina is more blunt and honest which is appreciated!*

*I like everything about how Kristina works because it almost seems **custom made for the individual** she is working with.*

***Kristina gave me permission to be myself!** I can say no other person has empowered me in that way as much as she has - and I am TRULY forever grateful for that.*

***A session with Kristina is always an investment in myself.** I never feel like any time was wasted and I always leaving feeling better and more inspired than I did when I got there.*
