## Youth Summer Programs in SF...

San Francisco is home to more than 50,000 elementary and middle school age youth, all of whom need enriching, positive, and fun activities in the hours away from school. Out of School Time (OST) programs provide learning opportunities for youth that foster their academic, socio-emotional, and physical development during after school hours, weekends, and summers. OST covers a wide range of programs that promote learning, take place outside of regular school hours, and enhance the cognitive, social, physical, artistic and/or civic development of youth. OST programs provide a safe, accessible space, operate at both school and community sites, and encourage youth to explore the world around them.

Out of School Time programs meet a number of community needs:

- Safe, structured place for children and youth while parents work
- Youth development supports and opportunities to assist youth in becoming healthy, successful adults
- Activities that can complement the lessons of the school day
- Enrichment opportunities designed to explore the world around them
- Healthy physical fitness and recreational activities
- A place to have fun!
