

# TRIBAL SOLARTHON

GRID Alternatives 2015

## Join us in Rosebud, South Dakota for our Tribal Solarthon!

GRID Alternatives' Tribal Solarthon event will showcase our work bringing solar power and solar job training to tribal communities across the country. Over the course of two weeks, we'll install solar in four different communities in California, Arizona, South Dakota and New York.

Facing significant economic challenges in its community, the Rosebud Sioux Tribe in South Dakota is looking at solar as a way increase job opportunities and reduce electricity costs for residents. **Please join us on October 8** as we work with the Rosebud community to install a grid-tied residential PV system to provide solar training for students at the Sinte Gleska University community college, as well as local high school students who recently participated in a STEM training with GRID in Denver, CO.
