

PathGuide Technologies

[PathGuide Technologies](#), located in the greater Seattle area, provides distributors and warehouse operators a complete warehouse management solution designed to increase productivity, improve customer satisfaction and lower labor costs. Founded in 1989, the company today has of clients spread across North America.

Our Business is WMS

Whether a company is looking to increase its picking and shipping speeds, reduce inventory, improve order accuracy, or implement advanced functions such as driving material handling systems and shipping, PathGuide views the warehouse as a crucial part of the supply chain machine - it needs to run smoothly in order to maintain a business's profitability.

PathGuide offers best-of-breed warehouse management solutions that make distribution businesses run more efficiently. The company's enterprise-grade [Latitude](#) WMS offers advanced features and flexible customization that provide the tools to expand sales, improve customer service and outperform the competition. Latitude has been designed to be modular, offering a growing range of core and advanced features tailored to the needs of wholesale, retail and electrical distributors.

These features include tools such as incident tracking, which enables users to easily create and track issues, including receiving discrepancies, incorrect shipments and customer and vendor problems. Another feature growing in popularity is voice-enabled transactions, allowing warehouse workers to use both hands while picking, packing and shipping items. Finally, Vendor Managed Inventory (VMI) helps customers to manage inventory replenishment orders onsite using a convenient handheld RF – without a sales person or manual data entry.

Seamless Integration

Many companies have an installed ERP that does double-duty handling basic warehouse management tasks. In order to ensure that this investment is not wasted, Latitude integrates seamlessly with all [major ERP business systems](#), including Epicor Prophet 21, Eclipse, Eagle and Acclaim, as well as Infor, Microsoft Dynamics, J.D. Edwards, Oracle, SAP, and more.

Collaboration is Key

Development of a sophisticated, adaptable WMS cannot take place in a vacuum. Over the years, PathGuide has taken a collaborative approach to making improvements and upgrades to its flagship Latitude product. The company organizes an annual Latitude User Conference, giving PathGuide customers and prospective users a chance to meet with their peers from a broad cross-section of industries. PathGuide also established a Latitude Advisory Board (LAB), made up of clients representing multiple industries ranging from electrical distribution and retail to marine supplies and architectural detailing. These seasoned professionals provide advice on future product enhancements and best practices that cater to their respective industry.
