GS Lighting Group

Who We Are

Gross Sales Ltd., is a leading lighting service company representing lighting manufacturers to the design, engineering, distribution and contracting communities. Our focus is in Architectural Lighting Systems for the commercial, education, healthcare, athletic, industrial and residential markets.

History

Gross Sales Ltd., was established in 1991 with a focus on improving any space with the use of indirect lighting. Today, we are a leading manufacturer's representative in the lighting industry. We're continually linking lighting applications with quality lighting from leading manufactures, with design and architectural intent.

Vision

Gross Sales is a lighting agency that envisions a brighter and more energy efficient future. The last two decades have seen many changes in the lighting industry, but our vision to improve an environment with light still remains our focus.

Mission Statement

Gross Sales is committed to providing our customers with unparalleled support and the highest possible level of service in our pursuit of business excellence. Our goal is to help inspire creativity by offering the highest quality lighting products that meet the requirements of virtually any project.

"Partnerships Lighting the way to a Green Future"

Services & Lighting Design

Gross Sales Ltd. is a service driven agency. We support our manufacturers and clients with support services to aid in design and supply.

Sample/Mockups
Lighting Layouts/Photometrics
Feasibility/Quotations
Education/Promotion
Design Collaboration
Site Review
Project Management
Field Support
Complete Customer Service

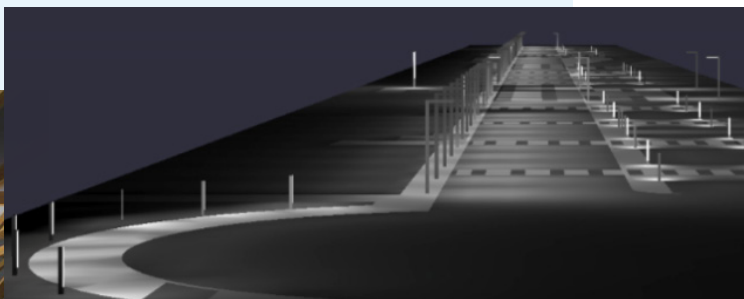

From architectural concept, feasibility studies, ergonomics, lighting requirements, and sustainability considerations, Gross Sales Ltd. provides the technological innovation in product developments to achieve great lighting design to meet all client needs and expectations.

Today's process in lighting design is truly a partnership of all disciplines from owner, architect/designer, engineer and supplier. Lighting designs today need to create environments that are healthy, increase work space efficiencies, reduce carbon footprint with sustainable means and accomplish true building innovation. The strength of partnerships leads to this innovation.

Retrofit

Maximizing your potential energy savings with our industry leading LED products and controls starts with a comprehensive design approach, which focuses on three key areas of your facility. The redesign with our LED lighting solutions will put the light where it is required, and can be integrated with lighting controls right from the factory.

LED Retrofit Program

Gross Sales Ltd., is committed to building a sustainable platform with lighting partnerships in manufacturing, distribution, and installation that believe lighting innovation will lead the way to a Green Future. It is our social responsibility and stewardship that will assist the institutional, commercial and industrial sectors in the rebuilding and replacing of existing lighting systems to current LED technology from leading North American lighting partners.

We bring to the market a support network that provides engineered solutions assisting in lighting design, sample installations and costing models that deliver short return on investment and provide substantial and sustainable energy reductions for exterior and interior lighting systems.

saveONenergy

RETROFIT PROGRAM

GET UP TO 50%

Receive up to 50% of project costs for upgrading old or inefficient equipment.

PROCESS AND SYSTEMS

GET UP TO 70%

Receive up to \$50,000 for engineering studies and up to 70% of capital costs for energy efficiency upgrades.

AUDIT FUNDING

GET UP TO 50%

Receive up to 50% of the cost of an energy audit to identify opportunities for energy efficiency.

SMALL BUSINESS LIGHTING

GET UP TO \$1500

Qualifying businesses can receive up to \$1,500 in new energy efficient lighting.
