

Travel Pal!

A Mobility Tool to Help You Make Sustainable Transportation Choices?

Every day we make choices about how we get around the South Bay. Every place we go requires us to decide if we'll take public transportation, drive alone, walk or bicycle? We make these choices based on time, cost and, sometimes, for health benefits. We can also make these choices based on environmental impact that they'll have!

Did you know that the one of the largest contributing factors to Green House Gas (GHG) emissions is driving alone in our personal vehicles? A good portion of your personal carbon footprint is based on the choices you make to get around. Do you know what that looks like or what kind of impact you would have based on the choice you make for how you are going to travel?

Travel Pal is an exciting new mobility tool that will let you discover the environmental impacts and savings you'll get based on the type of travel choice you make!! Simply register, login and start logging your trips to learn more about the emissions you save. It's a great way to understand the environmental benefits of walking, bicycling, taking the bus or carpooling!

How do I discover what my GHG savings will be?

1. Go to <https://southbaytravelpal.com> and register or login to set up your account.
2. Once you've registered, you're ready to start logging your trips. Simply go to the "Log Trips" tab on your dashboard and enter the date, distance and type of mode you used to travel – to get a good estimate we recommend you try this for a week or two.
3. You can check the GHG savings as well as other metrics by clicking on the "My Stats" tab under your name on your dashboard.

Visit Travel Pal today and discover that the choices you make in how you get around can make a difference in your personal efforts to help with climate change. For any questions about [Travel Pal](#), please feel free to reach out to info@southbaytravelpal.com
