SFR

FLUOROCARBON FINISHING WAXES

Hydrophobic, for normal conditions 55% < RH < 85%.

Pure Fluorocarbon finishing waxes. Great in normal humidity, normal water content and clean snow.

FHF-FUNCTIONAL HIGH FLUOR

SUPER-HYDROPHOBIC

Spherical Nano Fluor Finishing Wax for high humidity, wettest, dirty new and old snow conditions RH > 75%.

Self-cleaning base finish that matches ski structure with no gaps in Fluorine coverage and the greatest water droplet contact angles.

FHF1 PURE FHF DROPS
for water in the track. 2 drops
wraps entire base in 100% Fluor
liquid. A rare beast. Burn FHF5
powder over FHF to gain ideal ski
over dryer parts of course as well.

FHF5 WET SNOW FHF POWDER
Coarse snow- FHF2 Glider underneath,
FHF1 under if water in tracks.

FHF9 COLD POWDER
high humidity cold snow

FHF3 SPRINT FHF LIQUID RUB both sides of freezing

FHF7 BELOW POWDER
Below Freezing Extra High
Humidity-Coarse Grain Old
Snow- FHF6 under.

FHF11 FHF UNDER FREEZING BLOCK easy application wide temp range.

BM-BLACK MAGIC

FLUOR + MOLYBDENUM

Dirty, coarse and artificial snow 55%<RH< 75%.
