

Mathemania at the Chicago Children's Museum

Chicago Children's Museum is kicking off Spring Break with Mathemania, a program dedicated to inspire the love of math through play.

Throughout March and April every day at 11:15 am and 2:15 pm, the museum will offer creative approaches to teaching and reinforcing math concepts for preschool to school-aged children, such as using stamps to make a pattern, counting and measuring ingredients to make play dough, learning the basic of fractions with the help of a giant pizza pie, or testing which shapes fly the farthest using a wind machine.

Neighborhoods of the World

Every Sunday at Navy Pier, Neighborhoods of the World showcases Chicago's most vibrant cultural communities with live music, authentic cuisine, dance performances and art.

March 27: Greek Celebration Sunday, April 3: Celebrate Mexico Sunday, April 10: Celebrate Poland Sunday

Chicago Architecture Foundation - LEGO

Hosts various events and workshops linking LEGO with architecture. They are fantastic for developing children's problem solving and STEAM skills.
