The Unstuck and On Target!© Social Intervention Program helps children ages 7—11 with social learning disabilities understand the complexities of social interactions and friendships. This 20-week intervention program, based on the nationally-distinguished, research-based curriculum of the same name, is perfect for highly verbal and intelligent children who struggle to understand:

- How to Be a Friend
- Emotional Self-Identification
- Self-Advocacy
- Verbal and Non-verbal Social Cues
- How to be a Successful Member of a Group
- Who is a Friend

The Unstuck and On Target!© Program combines weekly therapeutic student groups with bimonthly parent instructional groups to create a wrap-around intervention program that educates and supports the entire family.
